Josephine McMaster is pretty and smart, but very much a klutzy mess. Finally, at 26, she may have actually lost the dreaded 'McMaster the Disaster'

nickname that has followed her around her whole life. Josie's quite content to be single, much to her mother's disappointment. So when a bizarre contest is announced where a socialite is holding a lottery to pick her bridesmaids (and rake in a little extra cash), she can't roll her eyes fast enough, even if it does mean meeting Jake Hall, her one and only movie star crush. Obviously, Josie doesn't enter the bridesmaid lottery, so you can imagine her surprise when her picture pops up among the winners, thanks

to Mom. With a little prodding -- okay bribing -- Josie agrees to participate. The wedding turns into the event of the year, and Josie finds herself in the middle of a paparazzi feeding frenzy, which gets even crazier after Jake Hall takes a special interest in her. Can Josie handle the pressure in the spotlight? Is it possible she might really have a chance with Jake Hall? And if she's busy worrying about all that, how in the heck is she going to keep 'McMaster the Disaster' from showing up in front of the entire world?

Brief Synopsis Run Rachel Run is
a true story. (Not just based on a
true story.) Rachel Blum was 12
when the Nazis invaded her
town. Over the next three years,
she witnessed war, risked her life
to smuggle food for her family,
escaped liquidation, hid with a
kind Polish couple whose son
worked for the SS, was
questioned if she was a Jew by an

incredibly dangerous scheme to

just an incredible, action-packed

story, but represents a character arc that young women, as well as young men, as well as adults of all types can draw inspiration from. She did not begin as a selfless, courageous young girl she came to be. Her strength and determination evolved through her experiences. Once you start "Run Rachel Run," you won't be able to put it down. Once you finish, you'll be shivering in awe how invigoratingly heroic the story of Rachel Blum is. Reviews "This is incredible!" Jessica Classen "What a testimony of courage and love" Rick Dearmore "Wonderful and inspiring and brave person"

Helen Schwab An Excerpt July, 1944. Ivan Roluk couldn't believe he was listening to a 15-year-old girl - and putting his life and the life of his family in her hands! But she was right. Driving trains for the Nazis for three years now, he knew exactly who the Germans were. He knew that there were once more than 20,000 Jews in the girl's home town of Ludmir, and now there was only one. The courageous young girl, Rachel. Rachel -- who had just convinced him to risk his life, as well as the life of his wife and son. There was a risk either way, of course. The war was coming to an end and who

knew what the Germans would do to them once they didn't need his services any longer. It was a risk to do it, but a risk not to do it. He looked behind him. The 20 train cars filled with over 1,000 wounded Nazi soldiers snaked behind his engine-car like a meandering river. In the caboose at the tail of the train was his wife, his son and the little Jewish girl. Suddenly, he heard a slam. What was that? It sounded like the door connecting the engine-car to the first car, which was occupied by high-ranking Nazi officers. Was one of them coming up front? The moment of truth had arrived. He thrust

The Wedding Wager Avon “ A personal look behind the scenes ” (Publishers Weekly) of the presidency of Gerald Ford as seen through the eyes of Donald Rumsfeld—New York Times bestselling author and Ford ’ s former Secretary of Defense, Chief of Staff, and longtime personal confidant. In the wake of Richard Nixon ’ s Watergate scandal, it seemed the United States was coming apart. America had experienced a decade of horrifying assassinations; the unprecedented resignation of first a vice president and then a president of the United States; intense cultural and social change; and a new mood of cynicism sweeping the country—a mood that, in some ways, lingers today. Into that divided atmosphere stepped an unexpected, unelected, and largely unknown American—Gerald R. Ford. In contrast to every other individual who had ever occupied the Oval Office, he had never appeared on any ballot either for the presidency or the vice presidency. Ford simply and humbly performed his duty to the best of his considerable ability. By the end of his 895 days as president, he would in fact have restored balance to our country, steadied the ship of state, and led his fellow Americans out of the national trauma of Watergate. And yet, Gerald Ford remains one of the least studied and least understood individuals to have held the office of the President of the United States. In turn, his legacy also remains severely underappreciated. In When the Center Held, Ford ’ s Secretary of Defense Donald Rumsfeld candidly shares his personal observations of the man himself,

providing a sweeping examination of his crucial years in office. It is a rare and fascinating look behind the closed doors of the Oval Office, including never-before-seen photos, memos, and anecdotes, from a unique insider's perspective—“engrossing and informative” (Kirkus Reviews) reading for any fan of presidential history.

How To Do Primary Care Research W.W. Norton & Company

Neuroscientist V.S. Ramachandran is internationally renowned for uncovering answers to the deep

and quirky questions of human nature that few scientists have dared to address. His bold insights about the brain are matched only by the stunning simplicity of his experiments -- using such low-tech tools as cotton swabs, glasses of water and dime-store mirrors. In *Phantoms in the Brain*, Dr. Ramachandran recounts how his work with patients who have bizarre neurological disorders has shed new light on the deep architecture of the brain, and what these findings tell us about who we are, how we construct our body image, why we laugh or become depressed, why we may believe in God, how we make decisions, deceive ourselves and dream, perhaps even why we're so clever at philosophy, music and art.

Some of his most notable cases: A woman paralyzed on the left side of her body who believes she is lifting a tray of drinks with both hands offers a unique opportunity to test Freud's theory of denial. A man who insists he is talking with God challenges us to ask: Could we be "wired" for religious experience? A woman who hallucinates cartoon characters illustrates how, in a sense, we are all hallucinating, all the time. Dr. Ramachandran's inspired medical detective work pushes the boundaries of medicine's last great frontier -- the human mind -- yielding new and provocative insights into the "big questions" about consciousness and the self.

This practical ' How To ' guide talks the reader step-by-step through designing, conducting and disseminating primary care research, a growing discipline internationally. The vast majority of health care issues are experienced by people in community settings, who are not adequately represented by hospital-based research. There is therefore a great need to upskill family physicians and other primary care workers and academics to conduct community-based research to inform best practice. Aimed at emerging researchers, including those in developing countries, this book also addresses cutting edge

and newly developing research methods, which will be of equal interest to more experienced researchers.
