A Study Guide for Jack London's "The Call of the Wild" Wordsworth Editions

One of the most knowledgeable and provocative explicators of Paul de Man's writings, Rodolphe Gasché, a philosopher by training, demonstrates for the first time the systematic coherence of the critic's work, insisting that de Man continues to merit close attention despite his notoriously difficult and obscure style. Gasché shows that de Man's "reading" centers on a dimension of the texts that is irreducible to any possible meaning, a dimension characterized by the "absolutely singular." Given that de Man and Derrida are both termed deconstructionists, Gasché differentiates between the two by emphasizing Derrida's primary interest in "writing," and postulates that the best way to come to terms with de Man's works is to "read" them athwart the writings of Kant, Fichte, Hegel, Heidegger, and Derrida. He shows his respect for the "immanent logic" of de Man's thought--which he lays out in great detail--while revealing his uneasiness at the oddness of that thought and its consequences.

"At an obscure South Carolina nursing home, a lost world reemerges as a disabled elderly woman undergoes newfangled brain-restoration procedures and begins to explore her environment with the assistance of strap-on robot legs. At a deluxe medical spa on a nameless Caribbean island, a middle-aged woman hopes to revitalize her fading youth with grotesque rejuvenating therapies that combine cutting-edge medical technologies with holistic approaches and the pseudo-religious dogma of Zen-

infused self-help. And in a rinky-dink mill town, an adolescent girl is unexpectedly inspired by the ravings and miraculous levitation of her fundamentalist friend's weird grandmother. These are only a few of the scenarios readers encounter in Julia Elliott's debut collection, *The Wilds*. In these genre-bending stories, teetering between the ridiculous and the sublime, Elliott's language-driven fiction uses outlandish tropes to capture poignant moments in her humble characters' lives. Without abandoning the tenets of classic storytelling, Elliott revels in lush lyricism, dark humor, and experimental play. "--

Venturing out of the laboratory into the wild of natural settings, it becomes untenable to locate memory strictly in the head. Instead, memory appears as a materially extended and socially distributed process, embedded within culture and history. This book explores the complex relations between practices of remembering and the settings in which they are enacted. It advances a novel set of concepts developed from ecological, cognitive, cultural and narrative currents in psychology and further afield to analyze (1) trajectories of autobiographical remembering, (2) the relation between individual and collective memory, (3) memory and cultural transmission, as well as (4) various methodological techniques to investigate memory in the wild.

From trauma educator and somatic guide Kimberly Ann Johnson comes a cutting-edge guide for tapping into the wisdom and resilience of the body to rewire the nervous system, heal from trauma, and live fully. In an increasingly polarized world where trauma is often publicly renegotiated, our nervous systems are on high alert. From skyrocketing rates of depression and anxiety to physical illnesses such as autoimmune diseases and digestive disorders, many women today find themselves living out of alignment with their bodies. Kimberly Johnson is a somatic practitioner, birth doula, and postpartum educator who specializes in helping women recover from all forms of trauma. In her work, she's seen the same themes play out time and again. In a culture that prioritizes executive function and "mind over matter," many women are suffering from deeply unresolved pain that causes mental and physical stagnation and illness. In Call of the Wild, Johnson offers an eye-opening look at this epidemic as well as an informative view of the human nervous system and how it responds to difficult events. From the "small t" traumas of getting ghosted, experiencing a fall-out with a close friend, or swerving to avoid a car accident to the "capital T" traumas of sexual assault, an upending natural disaster, or a life-threatening illness—Johnson explains how the nervous system both protects us from immediate harm and creates reverberations that ripple through a lifetime. In this practical, empowering guide, Johnson shows readers how to metabolize these nervous system responses, allowing everyone to come home to their deepest, most intuitive and whole selves. Following her supportive advice, readers will learn how to move from wholeness, tapping into the innate wisdom of their senses, soothing frayed nerves and reconnecting with their "animal selves." While we cannot cure the painful cultural rifts inflicting our society, there is a path forward—through our bodies.

Why the Wild Things Are Red Wheel/Weiser

A best-seller from its first publication in 1903, The Call of the Wild tells the story of Buck, a big mongrel dog who is shipped from his comfortable life in California to Alaska, where he must adapt to the harsh life of a sled dog during the Klondike Gold Rush. The narrative recounts Buck's brutal obedience training, his struggle to meet the demands of human masters, and his rise to the position of lead sled dog as a result of his superior physical and mental qualities. Finally, Buck is free to respond to the "call" of the wilderness. Over a hundred years after its publication, Jack London's "dog story" retains the enduring appeal of a classic. This Broadview Edition includes a critical introduction that explores London's life and legacy and the complex scientific and psychological ideas drawn upon by London in writing the story. The appendices include material on the Klondike, Darwin's writings on dogs, other contemporary writings on instinct and atavism, and maps of the regions in which the story takes place.

Wildlife and nature films are a hugely popular entertainment genre: networks such as Animal Planet and Discovery are stars in the cable television universe, viewers flock to IMAX theaters to see jaw-dropping footage from the wild, and the venerable BBC still scores triumphs with series such as Planet Earth. As cinematic technology brings ever more breathtaking images to the screen, and as our direct contact with nature diminishes, an ever-expanding audience craves the indirect experience of wild nature that these films provide. But this success has a dark side, as Chris Palmer reveals in his authoritative and engrossing report on the wildlife film business. A veteran producer and film educator, Palmer looks past the headlines about TV host Steve Irwin's death by stingray and filmmaker Timothy Treadwell falling prey to his beloved grizzlies, to uncover a more pervasive and troubling trend toward sensationalism, extreme risk-taking, and even abuse in wildlife films. He tracks

the roots of this trend to the early days of the genre, and he profiles a new breed of skilled, ethical filmmakers whose work enlightens as well as entertains, and who represent the future that Palmer envisions for the industry he loves.

For the Wild explores the ways in which the commitments of radical environmental and animal-rights activists develop through powerful experiences with the more-than-human world during childhood and young adulthood. The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection. Emotions and memories of wonder, love, compassion, anger, and grief shape activists' protest practices and help us understand their deep-rooted dedication to the planet and its creatures.

Drawing on analyses of activist art, music, and writings, as well as interviews and participant-observation in activist communities, Sarah M. Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity.
