Wind is the flow of gases on a large scale. On the surface of the Earth, wind consists of the bulk movement of air.In outer space, solar wind is the movement of gases or charged particles from the Sun through space, while planetary wind is the outgassing of light chemical elements from a planet's atmosphere into space.
Winds are commonly classified by their spatial scale, their speed, the ...

Including the UK, wind power across these six countries is currently running at about 28 GW, well below last year ’ s average of around 40 GW. Although wind power in Spain is running about 7 GW above average, it is not enough to offset the shortfalls elsewhere. In the UK alone, wind power is currently generating at 5 GW below Q3 last year.
