Wind is the flow of gases on a large scale. On the surface of the Earth, wind consists of the bulk movement of air. In outer space, solar wind is the movement of gases or charged particles from the Sun through space, while planetary wind is the outgassing of light chemical elements from a planet's atmosphere into space.

The wonderful, terrible *Gone With The Wind* definition is - a natural movement of air of any velocity; especially : the earth's air or the gas surrounding a planet in natural motion horizontally.

How to use wind in a sentence.

[Wind | Definition of Wind by Merriam-Webster](#)

What are winds? A 'wind' is simply the flow of a huge amount of air, usually from a high-pressure area to a low-pressure area. How are winds formed? Typically, this begins with the sun's radiation, which is absorbed differently on the earth's surface.

*Why Wind Power Isn't the Answer: As a new study confirms ...*

But we need to understand *Gone With The Wind*, and not just how it constructs affection for the pre-war era through its selective point of view (though that's an important lesson for any pop-culture connoisseur). It is both visionary and regressive, a work of progress that flaunts the worst parts of the past.

*The Basics of Wind Energy | AWEA*

The reality is that wind energy's expansion has been driven by federal subsidies and state-level mandates. Wind energy, cannot, and will not, meet a significant portion of our future energy needs because it requires too much land. Miller and Keith's paper shows that the ongoing push for 100-percent renewables, and,...

#### **The Wind Is Not A**

The Wind Is Not a River is Brian Payton's gripping tale of survival and an epic love story in which a husband and wife—separated by the only battle of World War II to take place on American soil—fight to reunite in Alaska's starkly beautiful Aleutian Islands.

#### What Is Wind?

What Is Wind? Air may not seem like anything at all; in fact, we look right through it all the time, but during a windstorm, air really makes its presence known. Wind is able to lift roofs off buildings, blow down power lines and trees, and cause highway accidents as gusts push around cars and trucks.

#### **The Wind and The Wave - Happiness Is Not A Place (Audio)**

Maybe, my friends, the answer is not blowing in the wind. Editor's Note: A County Board of Health in Western New York recently and officially advocated that industrial wind turbines be placed no closer to homes than 1.5 miles, and be limited to a maximum of 35 dBA noise.
