Interdisciplinary artist and writer Coco Fusco is one of North America's leading interpreters of intercultural theory and practice. This volume gathers together her finest writings since 1995 and includes critical essays by Jean Fisher and Caroline Vercoe that interpret her work. Engaging and provocative, these essays, interviews, performance scripts and fotonovelas take readers on a tour of our current multicultural landscape. Fusco explores such issues as sex tourism in Cuba as a barometer of the island's entry into the global economy, Frantz Fanon's theorization of metropolitan blackness, and artistic and net activist responses to the effects of free trade on the Mexican populace. She interviews such postcolonial personae as Isaac Julien, Hilton Als and Tracey Moffatt. Approaching the dynamics of cultural fusion from many angles, Fusco's satires, commentaries, and sociological inquiries collapse boundaries, and form a sustained meditation on how the forces of globalization impact upon the making of art.

The everyman/everywoman's guide to the meaning of life. Musician and teacher Jon Earnshaw examines the major questions of life and whether the Christian faith is able to provide answers which are relevant today. As a result of being expensively educated but badly taught in his chosen career he began to reflect on how seriously he had been let down by society. His many heated arguments with church leaders also convinced him that something was seriously wrong with Christianity. Money, selfishness and power appeared to corrupt both secular and sacred in equal measure. Embarking on a writing project which was to span over 10 years he began to examine the inconsistencies and contradictions in the Bible and the false teachings and pointless practices in Christianity. If you believe anything at all about God or religion then be prepared for a few surprises - most of what you already believe is not the full Bible truth. If you don't believe anything about God then this book will be interesting to say the least - for example, God exists because He Is Absolutely Obligated To. So is it a theology book, a spirituality book or a lifestyle book? It could be any of those things. I don't preach to my readers; I present the case for and against God in clear understandable language and leave it up to you. I look at - The Sinking Titanic of Planet Earth, The Descent of Man, The Misunderstood God, The End of The World, Does God Exist? Is God Cruel? The Impossibility of Faith, The Popular View Of Hell Is A Delusion, What Your Alpha-Class-Focus-Group-Outreach-Leader-Church-Pastor Will Never Tell You, The Earth is Not Ours, How Science is Nearer Religion Than You Think. And a few more. I hope that this will be a life-changing book for all readers. I also hope that it will at least make you think; the way that you think could change the future of the earth and the humans on it long after I have gone.

When Winston Churchill was a boy of sixteen, he already had a vision for his purpose in life. "This country will be subjected somehow to a tremendous invasion . . . I shall be in command of the defences of London . . . it will fall to me to save the Capital, to save the Empire." It was a most unlikely prediction. Perceived as a failure for much of his life, Churchill was the last person anyone would have expected to rise to national prominence as prime minister and influence the fate of the world during World War II. But Churchill persevered, on a mission to achieve his purpose. God and Churchill tells the remarkable story of how one man, armed with belief in his divine destiny, embarked on a course to save Christian civilization when Adolf Hitler and the forces of evil stood opposed. It traces the personal, political, and spiritual path of one of history's greatest leaders and offers hope for our own violent and troubled times. More than a spiritual biography, God and Churchill is also a deeply personal quest. Written by Jonathan Sandys (Churchill's great-grandson) and former White House staffer Wallace Henley, God and Churchill explores Sandys' intense search to discover his great-grandfather—and how it changed his own destiny forever.

David Kellogg Lewis (1941–2001) was one of the most influential philosophers of the twentieth century. He made significant contributions to almost every area of analytic philosophy including metaphysics, philosophy of language, philosophy of mind, and philosophy of science, and set the agenda for various debates in these areas which carry on to this day. In several respects he remains a contemporary figure, yet enough time has now passed for historians of philosophy to begin to study his place in twentieth century thought. His philosophy was constructed and refined not just through his published writing, but also crucially through his life-long correspondence with fellow philosophers, including leading figures such as D.M. Armstrong, Saul Kripke, W.V. Quine, J.J.C. Smart, and Peter van Inwagen. His letters formed the undercurrent of his published work and became the medium through which he proposed many of his well-known theories and discussed a range of philosophical topics in depth. A selection of his vast correspondence over a 40-year period is presented here across two volumes. As metaphysics is arguably where Lewis made his greatest contribution, this forms the focus of Volume 1. Arranged under the broad areas of Causation, Modality, and Ontology, the letters offer an organic story of the origins, development, breadth, and depth of his metaphysics in its historical context, as well as a glimpse into the influence of his many interlocutors. This volume will be an indispensable resource for contemporary metaphysics and for those interested in the Lewisian perspective.

Elizabeth Ferry explores how members of the Santa Fe Cooperative, a silver mine in Mexico, give meaning to their labor in an era of rampant globalization. She analyzes the cooperative's practices and the importance of patrimonio (patrimony) in their understanding of work, tradition, and community. More specifically, she argues that patrimonio, a belief that certain resources are inalienable possessions of a local collective passed down to subsequent generations, has shaped and sustained the cooperative's sense of identity.

The present volume is the fifth in a five-volume study of church doctrine. The multivolume set covers the major parts of church doctrine: Canon, God, Creation, Reconciliation, and Redemption. The first volume begins with an introduction to the entire project on why doctrine matters, which stresses the ecumenical, global, and above all biblical horizons of church doctrine as a primary expression of Christian witness. The purpose of this fifth volume is to explicate the full reality of God's redeeming love for the whole creation. In the doctrine of redemption, the church looks forward in hope. Through the gift of the Spirit at Pentecost the church is gathered out of all nations and peoples of the earth, and looks forward to the coming day of final redemption for the whole cosmos. Yet even now, the promise of God's coming is active in the world, rendering the church into a new humanity, establishing a new society, calling every individual to a new life of joy in discipleship. Church doctrine is not a luxury, but a necessity for the living community of faith, by which its witness in word and deed is tested against the one true measure of Christ the risen Lord.
