Paper airplanes as serious science? No longer shamefully relegated to the back rows of elementary-school sports stadiums, paper airplanes come into their own with this amusing -- and instructive -- book. The Great International Paper Airplane Book documents the proceedings of the first (and possibly only) International Paper Airplane Competition conducted by Scientific American. In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to paper airplane enthusiasts and would-be aviators of every age.

Full Color Edition: This exciting new twist on paper airplanes features simple to advanced designs. These are not your standard origami paper airplanes. Several designs are capable of reaching well over 150 feet. Detailed pictures guide you through step-by-step construction of the baseline designs and standard variants. Templates are included for 35 paper airplanes ranging from business jets, fighters, bombers, spy planes, and paper airplanes with variable sweep and forward swept wings. Test your skills at building and flying various models and even design your own, while experimenting with the wonders of flight. All of these paper airplanes are constructed using standard 8.5 x 11 20-24lb computer paper. The initial concept for these paper airplanes was developed 20 years ago by a middle school kid. That kid was me. This book is recommended for kids and adults 8 years or older. Kids younger than 10 years old may require assistance during construction. Pilots 6 years old and older are welcome.
