THE LYRIC STORY OF THE NET GENERATION-GROWING UP AND COMING OF AGE ON THE INTERNET The Internet is everywhere now, but Ray Valentine saw it first explode. CIRCUITS OF THE WIND is the story of Ray's quest to find himself as he grows up wandering the computer underground-

the wild, global outback that existed before the net went mainstream. How else does an end-of-century slacker reach out to the world from Sohola, that northern state that's a little more Midwest than it is New England? The net holds the key to what he's after-but even as he pioneers this virtual world, the veneer of his real life begins to crack. In VOLUME TWO of the CIRCUITS OF THE WIND trilogy, the net arrives all glimmering when Ray is starting college: it's brighter, quicker, better than he ever knew. It's the early 1990s-a time of golden youth and of joyriding on the growing Internet, where he rises as a leader of the global generation, the ones who saw it as the gilded portal to a fabulous new age everyone was about to enter. But he's coasting aimlessly-and when his college friends move on and fashions change he sees how real life actually might not be working out.

Music Composition and Learning Style J Weston Walch Pub

Following his much-acclaimed *The Baroque Clarinet* and *The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a

comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi, soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. From the Clarinet d'Amour to the Contrabass will engage all who love the clarinet and its music.

This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula. This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment and evaluation, motivation,

administrative tasks, and recruiting and scheduling (including block scheduling). The second section devotes a chapter to each wind instrument plus percussion and strings, and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school.
