## Goethe's theory of colours : Johann Wolfgang von Goethe ...

The wavelength theory of light and color had been firmly established by the time the great German poet published his Theory of Colours in 1810. Nevertheless, Goethe believed that the theory derived from a fundamental error, in which an incidental result was mistaken for a elemental principle.

## Theory of Colours by Johann Wolfgang von Goethe - Audiobook - Art, Design & Architecture

Johann Wolfgang von Goethe also proposed a symmetric color wheel and put emphasis on the importance of magenta, in contrast to Newton, who counted only spectral colors as fundamental. In his color wheel , Goethe also included several aesthetic qualities titled as “ allegorical, symbolic, mystic use of colour “ .

Goethe's Theory of Colours by Johann Wolfgang von Goethe ... Goethe's Color Theory. Unlike Newton, Goethe argued that color needed darkness, and some colors were made with elements of darkness. Here is how Goethe described it: 'Light and darkness, brightness and obscurity, or if a more general expression is preferred, light and its absence, one necessary to the production of color . . . color itself is a degree of darkness.'

The Project Gutenberg eBook of Goethe's Theory of Colours ... This color has a peculiar and almost indescribable effect on the eye. As a hue it is powerful - but it is on the negative side, and in its highest purity is, as it were, a stimulating negation. Its appearance, then, is a kind of contradiction between excitement and repose. ” Johann Wolfgang von Goethe, Theory of Colours
