Therapeutic
Exercise
Documentation
Components
Therapeutic
exercise is the
systematic

performance or
execution of
planned physical
movements or
activities intended
to enable the
patient or client to

remediate or prevent impairments of body functions and structures, enhance activities and participation, reduce risk, optimize overall health, and enhance fitness and well-being. Therapeutic Exercise - Physiopedia Documentation must show objective loss of joint motion (degrees of motion), strength (strength grades), or mobility (levels of assistance) Documentation must show how these therapeutic exercises are helping the patient progress towards their stated, objective and measurable goals

Medicare Documentation and Proving Medical Necessity ...

Therapeutic Exercise: Foundational Concepts | Therapeutic ...

Therapeutic Exercise. Therapeutic exercise -- CPT code 97110 -- involves instructing a patient in specific exercises to address weakness or loss of joint mobility due to disease or injury. These exercises are not typically

functional tasks. For example, overhead shoulder presses using dumbbells is a therapeutic exercise. CPT 97140, 97530, 97112, 97760, 97750 - Therapeutic ... Therapeutic exercise has numerous benefits for all patients. Therapeutic exercise programs should consist of endurance, resistance, and flexibility training. All 3 of these can be combined into 1... General
Guidelines for
Therapeutic
Procedures
97110, 97112 ...
Goal: increased
exercise
tolerance to a
particular

functional level
(based on prior
activity level)
without risk of
cardiopulmonary
event.

Documentation
would include
assessment of
vital signs (BP,
pulse,
respiration and
pulse oximetry)
before, during
and following
use of the
bicycle,
monitoring to
ensure vital
signs stay in
safe parameters
and including
time for vital
signs to return
to normal.

Documenting
Skilled Need in
Therapy Notes
When Providing
any Kind of

Therapeutic

Exercise

Documentation
should Include:

- Rationale, i.e.,
reciprocal pre-
gait activities,
reciprocal UE
motion, improving
ROM, strength,
tone, flexibility,
coordination,
reduce pain,
reduce edema,
improvement in
balance,
cardiovascular
endurance,
respiratory status
and functional
ability, etc.
