The Bodyguard Apress

In a sweeping vision for the future of work, Neumeier shows that the massive problems of the 21st century are largely the

consequence of a paradigm shift—a shuddering gear-change from the familiar Industrial Age to the unfamiliar “ Robotic Age, ” an era of increasing man-machine collaboration. This change is creating the “ Robot Curve, ” an accelerating waterfall of obsolescence and opportunity that is currently reshuffling the fortunes of workers, companies, and national economies. It demonstrates how the cost and value of a unit of work go down as it moves from creative to skilled to rote, and, finally, to robotic. While the Robot Curve is dangerous to those with brittle or limited skills, it offers unlimited potential to those with metaskills—master skills that enable other skills. Neumeier believes that the metaskills we need in a post-industrial economy are feeling (intuition and empathy), seeing (systems thinking), dreaming (applied imagination), making (design), and learning (autodidactics). These are not the skills we were taught in school. Yet they ’ re the skills we ’ ll need to harness the curve. In explaining each of the metaskills, he offers encouragement and concrete advice for mastering their intricacies. At the end of the book he lays out seven changes that education can

make to foster these important talents. This is a rich, exciting book for forward-thinking educators, entrepreneurs, designers, artists, scientists, and future leaders in every field. It comes illustrated with clear diagrams and a 16-page color photo essay. Those who enjoy this book may be interested in its slimmer companion, *The 46 Rules of Genius*, also by Marty Neumeier. Things you ' ll learn in *Metaskills*: - How to stay ahead of the “ robot curve ” - How to account for “ latency ” in your predictions - The 9 most common traps of systems behavior - How to distinguish among 4 types of originality - The 3 key steps in generating innovative solutions - 6 ways to think like Steve Jobs - How to recognize the 3 essential qualities of beauty - 24 aesthetic tools you can apply to any kind of work - 10 strategies to trigger breakthrough ideas - Why every team needs an X-shaped person - How to overcome the 5 forces arrayed against simplicity - 6 tests for measuring the freshness of a concept - How to deploy the 5 principles of “ uncluding ” - The 10 tests for measuring great work - How to sell an innovative concept to an organization - 12 principles for constructing a theory of learning - How to choose a personal mission

for the real world - The 4 levels of professional achievement - 7 steps for revolutionizing education From the back cover "Help! A robot ate my job!" If you haven't heard this complaint yet, you will. Today's widespread unemployment is not a jobs crisis. It's a talent crisis. Technology is taking every job that doesn't need a high degree of creativity, humanity, or leadership. The solution? Stay on top of the Robot Curve--a constant waterfall of obsolescence and opportunity fed by competition and innovation. Neumeier presents five metaskills--feeling, seeing, dreaming, making, and learning--that

will accelerate your success in the Robotic Age.

" A resounding character study just as much as it is an action novel, and both are equally triumphant. " —Kirkus Reviews To most people, Maj. John Rexford is a retired Marine living in the Catskill Mountains of New York on disability. Even John ' s girlfriend, Maggie, has no idea he ' s really a CIA spook recruited in Afghanistan and assigned to kill enemies on US soil. With exemplary skills in hand-to-hand combat and small arms weaponry, John Rexford completes a string of successful kills, eliminating terrorists and their money supply in the New York Metropolitan area. With the FBI hot on his trail for these illegal assassinations, John must

find a way to stop an international team of explosives from destroying New York City's aqueducts, killing thousands with chlorine gas, and burning the five boroughs to the ground. During his mission, John runs afoul of a high level underworld assassin who uses his mastery of yoga to silently strangle his victims. When the assassin discovers John's one liability—his girlfriend, Maggie—John will have to make a terrible choice between her life and the capture of her abductor. This tightly scripted story begins with a terrorist plot and gradually turns into a clash between two professional killers, with the lives of both John Rexford and Maggie hanging in the balance. As the characters collide with deadly force on the streets of New York in *Cut and Cover*, the line between right and wrong blurs, long-standing loyalties are questioned, and no one is really sure, even if they succeed, what the final outcome will be. The secret to surviving infidelity can be summed up in one word: trust. Along with changes in the workplace and the explosive growth of electronic communications, there has been a skyrocketing rate of infidelity. Today, up to forty percent of American marriages endure the pain of a cheating partner. The media is filled with stories of married politicians finding their “ soul mates ” and titillating instances of unfaithful celebrities. But in the homes of ordinary people everywhere, infidelity triggers complex emotions and events that affect everyone involved. Many marriage and personal therapists have adopted a “ me first ” mentality, prompting hurt spouses to end their relationships. Psychiatrist Scott Haltzman, retired Brown University professor, recommends exactly the opposite. The Secrets of Surviving Infidelity teaches both the victim and the perpetrator of infidelity

how to acknowledge their feelings, reduce their sense of relationship.

of despair, and begin the difficult task of rebuilding a strong relationship. People who cheat act much like those who have other addictions, and brain scans of love-struck individuals show a dramatic increase in the release of dopamine, the same brain neurochemical associated with cocaine abuse.

Haltzman does not excuse infidelity by labeling it a sex addiction; it ' s not orgasm that drives a partner to cheat. Instead, Haltzman coins the term "flame addiction" to describe how, like a moth drawn to the light, people feel compelled to have extramarital intimacy despite all the negative consequences.

People who have been cheated on feel shame, rage, and injured self-esteem. Many of them fear abandonment and find it hard to cope. When both partners have made a commitment to move forward together, however, Dr. Haltzman validates each person's feelings and puts them into perspective, offering sound advice on how to recover their equilibrium and reestablish a committed, trust-filled
