Written in the form of a technical manual, the book shares the authors thoughts and personal experience in a relaxed and conversational manner, easily understood by young people today. When we are children, we are filled with imagination, but as we get older, we lose the ability to dream. How many times have we heard well-meaning adults tell us Stop daydreaming and get to work. For most people, this leads to an unfulfilled life, and questions like Why am I here? or Where am I going? are either asked too late or not at all. The book likens our life journey to the apps that are installed on computers. The well-worn phrase There's an app for that inspired the author to imagine what it would be like if we could create apps for our life. This is a modern self-help book also based in reality. The author shares how he and others weathered the Great Recession and other obstacles with the help of the Starting Over app. In order to help guide the reader toward a more fulfilling life, the question Why am I here? is answered. We are here to leave a legacy for those who follow. This frees the reader up to pursue a meaningful life on the way to powering down.

No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be "app-dependent" versus "app-enabled" and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the

other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.
