Chilton's Commercial Carrier Journal for
Professional Fleet Managers Cengage Learning
Easy to read yet technically precise, MODERN
DIESEL TECHNOLOGY: HEATING,
VENTILATION, AIR CONDITIONING, AND
REFRIGERATION, 2nd Edition is the text of
choice for many of the country ' s best diesel
technology programs! Detailing the foundations
of truck heating, air conditioning, engine cooling,
and truck-trailer refrigeration, the book integrates
modern technical terms with photos that clearly
demonstrate typical, on-the-job tasks in logical
sequence. Coverage includes an entire section on
thermodynamics, as well as solid instruction on
safety, equipment, components, troubleshooting,
performance testing, maintenance, and even the
history of HVAC/R in the diesel trucking
industry. Enhanced with photos, drawings, and
self-testing questions in each chapter, MODERN

DIESEL TECHNOLOGY: HEATING, VENTILATION, AIR CONDITIONING, AND REFRIGERATION, 2nd Edition delivers the technical accuracy and depth of HVAC/R information you need for a rewarding career as a diesel technician. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Traffic World
This report should be of interest to transit bus maintenance managers and others interested in the development of written transit bus maintenance procedures, or "practices," and the sharing of these practices with others in the transit

industry. The report provides guidance on how to develop effective transit bus maintenance practices tailored to one's local operating environment. It provides seven sample practices developed using the guidance. Complementing this report is an on-line Web Board sponsored by the Transportation Research Board's Committee on Transit Fleet Maintenance. This Web Board allows transit agencies to post their maintenance practices for others to review, revise as necessary for their own operating conditions, and use. The report provides instructions on how to access the Web Board, use it to develop maintenance practices, and share these practices among transit agencies.

An Energy Approach

Beginning with 1937, the April issue of each vol. is the Fleet

reference annual.

Fleet Owner

This is a new edition of the standard air conditioning installation/service text, emphasizing energy conservation. It contains new material on heating and computer programs, and new load calculation problems. The book provides thorough coverage of the fundamentals of air conditioning, explains relationships of theory to design of new systems, and discusses troubleshooting of existing systems. Air conditioning and refrigeration equipment and systems, and refrigeration absorption systems and heat pumps

are all covered. Computer programs for load estimating are also described, and there are many illustrative examples of real-world situations. The text is consistent with all ASHRAE load estimating guidelines.
