Development of various energy sources continues across North America and around the world, raising questions about social and economic consequences for the places and communities where these activities occur. Energy Impacts brings together important new research on site-level social, economic, and behavioral impacts from large-scale energy development. Featuring conceptual and empirical multidisciplinary research from leading social scientists, the volume collects a broad range of perspectives to understand North America's current energy uses and future energy needs. Twelve chapters from respected scholars in a variety of disciplines present new ways to consider and analyze energy impact research. Focused on varied energy topics, geographies, and disciplines, each chapter includes a policy brief that summarizes the work and provides "key takeaways" to apply the findings to policy and public discourse. Meaningful public engagement is critical in limiting the negative implications of energy development, and understanding the social influences on and of energy systems is a cornerstone of addressing the climate crisis. As such, Energy Impacts is a significant work for students, scholars, and professionals working in sociology, education, geography, environmental studies, and public health. This material is based upon work supported by the National Science Foundation under Grant No. 1528422. Publication is also supported, in part, by Montana State University. School Development through Teacher Research – Lesson and Learning Studies in Sweden and Tanzania presents the results from a three-year-long joint research project conducted by educational researchers from Tanzania and Sweden. Even though the country contexts differ in social, economic as well as educational conditions, including teacher education and classroom standards, many recurrent education challenges are shared. These include the

tendency to make educational reforms with little or no input from professionals. The new educational reforms in both countries put a much higher responsibility on teachers; teachers must be able to organise teaching that enables all students to develop required abilities/competencies. Thus, teachers need tools to develop knowledge that can contribute to their professional knowledge base. With an overall interest in issues of teaching and action research, this joint project aimed to use Lesson and Learning Study as models for developing and improving the quality of teaching and learning in schools. The research project was realised through four case studies in each country with a focus on students ' development of specific capabilities and values Science, Vocational Skills/Home and Consumer Studies, English as second language and Mathematics in grades 6-7. Complementing the cases School Development through Teacher Research – Lesson and Learning Studies in Sweden and Tanzania offers an introductory background to Lesson and Learning Studies as models for teacher-driven research and school development. The book is written to support teachers and teacher educators ' wishing to reflect about learning and the struggle of learners to discern various concepts, principles and practices. As well as those who genuinely wish to see serious learning take place, rather than simply seeing content ' covered ' – including curriculum designers and developers, educational researchers, educational supervisors and leaders and student-teachers as well as students of pedagogy and didactics. We dedicate the book to teacher educators, teachers and school leaders who

are seriously striving to enhance students' learning and understanding in different subject areas. *Designing and Conducting Research in Health and Human Performance* Rowman & Littlefield Now in its third edition, *Academic Writing* offers a succinct and practical introduction to the development of research papers across the disciplines. Structured around contemporary genre theory, which establishes the importance of context for effective communication, the text describes the writing process step by step, including how to formulate a topic; gather and properly document sources; develop strong proposals, introductions, core paragraphs, and conclusions; and refine the final draft. Additionally, readers will observe the progress and thought processes of Jenna, a first-year student, as she crafts her own paper. New to this edition are materials for instructors that include full-length research papers, PowerPoint slides, an exam bank, and ideas for study. Rich with such pedagogical features as chapter learning objectives, annotated passages that illustrate aspects of academic style, and a glossary, *Academic Writing* is a must-have textbook for students developing their research and writing skills.

Project management as a discipline has experienced near-exponential growth in its application across the business and not-for-profit sectors. This original, authoritative guide

provides both practitioner and student researchers about how students use digital tools to write, both with a complete guide to research practice on project management. In *Designs, Methods and Practices for Research of Project Management*, Beverly Pasion has brought together original chapters from a veritable who's who of project management research including authors such as Harvey Maylor, Christophe Bredillet, Derek Walker, Miles Shepherd, Janice Thomas, Naomi Brookes and Darren Dalcher. The collection looks at research strategy, management, methodology, techniques as well as emerging topics such as social network analysis. The 38 chapters offer an international perspective with examples from a wide range of project management applications; engineering, construction, mega-projects, high-risk environments and social transformation. Each chapter includes tips and exercises for the research student, as well as a complete set of further references.

Action research is a form of research closely linked to practice which can readily be undertaken by practitioners and service users. This handbook offers a comprehensive guide to action research as a strategy for inquiry and development in health and social care. It can be used by individuals or groups working independently on their own projects or as a basis for a tutor-led course. It features * an introduction to the theories behind action research and other forms of research related to it * lively case studies from social work, nursing, mental health care and community work * a step-by-step study guide. The theoretical section of the book provides a general definition of action research, compares

action research with other forms of social research, outlines the nature of a 'culture of inquiry' in the workplace, and describes the links between action research and service-user research, management, community development, evaluation, reflective practice, feminist research and anti-racist research. This practical study guide covers issues such as preparing a proposal, ethics and principles of procedure, gathering and analysing data, writing a report, the links between action research and critical reflection. It will be particularly useful for groups wishing to undertake action research on an independent basis
