For the better part of the last half century, the United States has been the World's Police, claiming to defend ideologies, allies, and our national security through

brute force. But is military action always the most appropriate response? Drawing on his vast experience, from combat in Vietnam to peacekeeping in Somalia, to war games in Washington, DC and negotiations with former rebels in the Philippines, retired four-star General Tony Zinni argues that we have a lot of work to do to make the process of going to war—or not—more clear-eyed and ultimately successful. He examines the relationship between the executive and the military (including the difference between passive and engaged presidents); the failures of the Joint Chief of Staff; the challenges of working with the UN, coalition forces, and NATO; the difference between young, on the ground officers and less savvy

senior leaders; the role of special forces and drone warfare; and the difficult choices that need to be made to create tomorrow's military. Among his provocative points: * Virtually every recent American military operation follows a disconnected series of actions that lead to outcomes we never foresaw or intended. * We need to assign accountability for the political decisions that can make or break a mission. * Words and ideas are as important to victory in today's conflicts as bullets. * The cyber "war" is ongoing. Either you must build better tech than the other guy, or you must steal it. * Our foreign aid budget is pitiful, our State Department, USAID, and the other government agencies that we critically need to be on a par

with our military are underfunded, undermanned, and poorly structured for their current objectives. From the Oval Office to the battlefield, *Before the First Shots Are Fired* is a hard-hitting analysis of the history of America's use of military action and a spirited call for change.

Chinese warrior, Sun-tzu, taught that in order to win every battle, you must know yourself and you must know your enemy. We know that the United States of America is facing an attack unlike

anything it has ever experienced in its history. Why are we losing battle after battle in the face of an all-advancing evil? It's because we don't know ourselves and we don't know our enemy. After reading *They Fired the First Shot 2012(tm)*, you will learn how to know yourself, you will learn how to know your enemy, and you will know what to do. But will you do what this book shows you to do? After reading *They Fired the First Shot 2012(tm)*, you will not be able to keep yourself from following the directives contained within. You will read and learn many new thoughts and truths that will have an atomic bomb effect on your thinking. What you abided by before is not what you will

In 1940, the threat of war in the Pacific forced the United States to expand its fleet quickly. This effort included reconditioning and recommissioning "four stackers" from the navy's reserve fleet. Built in 1918 to fight German submarines, the USS Ward earned at Pearl Harbor the distinction of firing the first shot in America's war against Japan. In the three years that followed, it was bombed, shelled, strafed, and finally sunk (on December 7, 1944), yet none of her crew of 125 men ever lost a life in combat. Information is drawn from naval records as well as from interviews

with surviving crewmen.

Appendices provide Ward technical data, a chronology of major events, listings of citations earned in World War II and of amphibious landings, and a roster of personnel.

The Indian sepoy of the Native Infantry Regiment, in BarrISBN:pore, were appalled when they heard that the cartridges they bit into before loading their guns were going to be greased with cow and pig fat. It was an insult to their religious sentiments. The murmurings of dissent rose as the news spread but the British were insensitive to the reasons behind it. And then Mangal Pandey, a sepoy from the Native Infantry, fired the shot that triggered off the First War of Indian Independence.

This is the story of the Guadalcanal campaign as only a rifleman can tell it. In *Shots Fired in Anger*, Lieutenant Colonel John B. George recounts his brutal experiences in frontline jungle warfare and examines the weapons, tactics, equipment, and combat mentalities that won and lost the fight. For George, marksmanship was always more than a hobby--it was a preparation for national defense. When he is inducted into the U.S. Army as a second lieutenant, he's shocked to see that the military lacks the same enthusiasm: the troops have not been taught to shoot or to march, and they are commanded by men obsessed with obsolete tactics and eyewash. It is only by desperate negotiating that he is able to secure two days of rifle training for his platoon before they are shipped to the Pacific. On Guadalcanal, George leads from the front with a sniper's calm and a scientist's eye for detail, analyzing what works and what doesn't--from the terrifying but suicidal Japanese Banzai

charge to the reliable and effective M1 Garand--in trial by fire. The author interviews his fellow soldiers, questions prisoners, disassembles captured and borrowed weapons, and uses, commands, and faces these strategies and implements of war on the battlefield. All of this comes together in a fascinating combination of personal memoir and combat dossier. Few other writers have ever been able to rival George's combination of field experience and excellent storytelling. Laced with informative illustrations and lightened by stories of hunting, drinking, and military jokes played in the face of death, *Shots Fired in Anger* is one of the most important and entertaining firsthand accounts to arise from WWII.

“ You either love Andrea Camilleri or you haven ’ t read him yet. Each novel in this wholly addictive, entirely magical series, set in Sicily and starring a detective unlike any other in crime fiction, blasts the brain like

a shot of pure oxygen. Aglow with a macabre world of sadism, local color, packed with flint-dry wit, as fresh and clean as Mediterranean seafood — altogether transporting. Long live Camilleri, and long live Montalbano. ” A.J. Finn, #1 New York Times bestselling author of *The Woman in the Window* With Inspector Montalbano's most recent outings hitting the New York Times bestseller list, Andrea Camilleri's darkly refined Italian mysteries have become favorites of American crime novel fans. This latest installment finds Montalbano in search of his missing right-hand man. Before leaving for vacation with Livia, Montalbano witnesses a seagull doing an odd dance on the beach outside his home, when the bird suddenly drops dead. Stopping in at his office for a quick check before heading off, he notices that Fazio is nowhere to be found and soon learns that he was last seen on the docks, secretly working on a case. Montalbano sets out to find him and discovers that the seagull's dance of death may provide the key to understanding

extortion, and murder.

 Things haven ' t been going particularly well for humanity. A new civilization has risen from the ashes of the late 21st century End of Times, and it has thrived in the few remaining inhabitable highland areas of the planet, thanks mainly to the all-powerful State governance engineering a series of stunning advances in Artificial Intelligence. Something, however, is going horribly wrong on Planet 42. People are disappearing at an

alarming rate, and the State is beset by a series of crippling scandals all the while most of its people slave away in something close to abject poverty. So much for the supposed socialist utopia. Andrew Weems is a scrawny young journalism student in *The Highlands of Alba*, once known as Scotland. He has a quirky, some would say annoying sense of humor and swears quite a lot. His best friend is John McGregor, an elite Alban college student, and his other friend is John's girlfriend, Claire Renshaw, a talented cybercrimes student. In trying to find information on the death of her older sister, Claire hacks into some highly classified State data relating to something known as the Elyssium program, and the discovery sets in motion a chain of events that will lead them all on an epic journey encompassing kidnap, murder, assassination attempts, fishing, strange mushrooms, and the resultant sea monster, and other things. Ultimately, the shocking truth about the disappearances is exposed and this leads Claire to a confrontation with horrors, and

evil beyond imagination. Except that it has been imagined, so ... with horrors and evil beyond comprehension, instead.

The Dance of the Seagull
From the #1 New York Times bestselling author of the Joe Pickett series comes a thrilling collection of suspense stories about the Wyoming he knows so well—and the dark deeds and impulses that can be found there... C. J. Box has been hailed for his brilliant storytelling, with a style rich in character, suspense, and sense of place. That same brilliance is exemplified in the ten riveting stories—three of them never before published—that make up *Shots Fired*. In “One-Car Bridge,” one of four Joe Pickett stories, Pickett goes up against a just plain mean landowner, with disastrous results. In “Shots Fired,” his investigation into a radio call nearly ends up being the last thing he ever does. “Pirates of

Yellowstone, ” features two Eastern European tough guys who find out what it means to be strangers in a strange land, and in “ Le Sauvage Noble, ” the stranger is a Lakota in Paris who enjoys playing the noble savage for the French women—until he meets Sophie. Then he discovers what savage really means.... Shots Fired is proof once again why “ Box is a force to be reckoned with ” (The Providence Journal-Bulletin). The USS Ward For good reason, the second and third days of the Battle of Gettysburg have received the

lion's share of attention from historians. With this book, however, the critical first day's fighting finally receives its due. After sketching the background of the Gettysburg campaign and recounting the events immediately preceding the battle, Harry Pfanz offers a detailed tactical description of events of the first day. He describes the engagements in McPherson Woods, at the Railroad Cuts, on Oak Ridge, on Seminary Ridge, and at Blocher's Knoll, as well as the retreat of Union forces through Gettysburg and the Federal rally on Cemetery Hill. Throughout, he draws on deep research in published and archival sources to challenge many long-held assumptions about the battle. The Northeastern Reporter
