In the past 50 years we have seen and documented more environmental changes than in all of recorded history. Why are these things happening now? Is man contributing to, or the cause of the problem? Or is this just a natural cycle that we happen to be living through in our time? Whatever the answers to these questions you can be sure of one thing: our Earth's environment is changing and we are living during that time of change. We

need to be sure of this and not be complacent. The time for us to learn what to do is now and not after disaster strikes us and our families. This book is not strictly about stockpiling guns, medical supplies, food, and water, then barricading your family in a concrete house somewhere in the wilderness. This is about understanding what is changing, why it's changing, and what you can do to protect yourself and your family under these unknown circumstances. Physical preparation is important, but it's not the only thing that needs to be done and it definitely should NOT be done without correct understanding and attitude. The book's unique approach to being prepared for the coming change is more than just physical preparation from a survivalist standpoint. Rather than use a strict guns-and-glory generic survival plan for everyone, the reader is given general guidelines with the proper thought provoking questions to spark a better attitude. Throughout the text the reader is asked questions that only he or she can answer. This approach allows everyone to prepare and learn according to their own understanding and ability. A natural question that comes to everyone's mind is, "What if this doesn't happen?" This is a perfectly valid and understandable question and is directly addressed in the book. The author pulls no punches when it comes to the various facts and predictions listed in the book, their probability of occurring, and the likely outcomes. But he also addresses the non-believer: "One more thing to think about that people always ask me is: "What if this doesn't happen?" That's a good question and a very valid one. What if Earth changes are nothing more than that millennial madness that I mentioned earlier? Look at it this way: How prepared are you to handle even the smallest disaster or upset? Prepared and ready? For how long? A couple of days? A week? A month? Two? Three? What about only being slightly prepared? Maybe if you really think fast when something happens you and your family could survive a week without services and conveniences. How does that make you feel? What if that were the case and the situation in your area lasted two weeks? Most people are the "It won't happen to me" thinkers. Yet every year a large number of people die because there was a freak tornado, torrential rainstorm, winter snowstorm, power outage, chemical spill, water supply disruption, or even a simple heat wave. Did you ever wonder why people who weren't caught directly in the path of the disaster die in those situations? The answer is obvious; they never thought it would happen to them so they never prepared for it." Whether you believe in Earth changes or not having this book could save yourself and your family a great deal of hardship, and possibly your life, when something unexpected happens. Why take a chance on your family's future? Be prepared, spiritually, physically, and mentally for the inevitable.

Transformation captivates a world hungry for change. Transformation looks like hearts cracking open to God's touch, reconciliation in relationships, and the restoration of broken character. It is powerful to heal both within the church and the community, and our need for it today is great. But transformation like this doesn't happen casually. Christian leaders are called to lead transformation within themselves and others but often do not understand the fundamental nature of how change really happens in the heart. Like throwing good seed onto poor soil, leaders miss the groundwork needed to produce genuine change. Authors Scott Larson and Daniel L. Tocchini have spent their lives learning how to do this groundwork. Through a combination of storytelling, research, and methods garnered from years of practice, the authors share their experiences of leading transformation within ministry and business. In Groundwork they invite leaders and ministry professionals to learn from both the authors' mistakes and achievements and to put into practice the knowledge of what works and what impedes true change. Jesus taught that the seeds of God's transformative power are freely sown; let's do the groundwork so God's seeds land on good soil and bear the fruit of hope and healing. Transformation captivates a world hungry for change.

Elaine Kamarck traces the paths of a series of modern policy initiatives from the orderly world of analysis to the messy world of partisan politics.Dissecting the reasons for policy success and failure, she offers an intriguing new perspective on how change happens in the space where politics and policy overlap. --

In the world of tech-consulting, not all employers and staffing companies play by the rules. Charlie O'Neal discovers this truth when his project manager unintentionally reveals the terms and conditions of his contract. Enraged and furious, he seeks revenge. This time, Charlie decides not to back down from the bullies, and he carefully plots his revenge.He meets with one of "The Three Musketeers", as the employees refer to the executives running the staffing company, and is introduced to Sir Archibald, the cat of Heinz Conrad. Charlie is scared stiff when he realizes that he may just be working for the person responsible for the most tragic event in his past. When he immigrated to the USA, he tried to leave behind the memories about his past and the mysterious Sir Archibald, but it seems to have been following him all the time.This 110-thousand word fictional mystery and suspense novel is a page turner. The story is so real, when you have read it, the first question you will ask is: "Is this real?" The self publishing author will smile at you and say: "Who will really know?" A friend on facebook asked me one day "What is the book about?" Below is my answer back to him.First of all, remember it is fiction!! It is a mystery and suspense novel, with crime, murder, fraud, schemes and all the makings for a good story. Although people who know me will think different once they have read the book. I used some of my personal experiences from living in a dormitory for five years in high school, being in the South African military, living on campus at university and my first job at a bank to make the story more realistic. Naturally having been in the military, I had to open the book with a black Mercedes being blown to pieces when it strikes a landmine.The story takes place mostly in the USA where Charlie O'Neal lives and work as an IT consultant. He is outraged when he discovers how he and his co-workers, mostly immigrants like him, are being exploited by their employer. In his search for answers and the truth, he is faced with his own past that he tried to forget. The painful memories that drove him out of South Africa includes a secret bank account. The only question is, is the money really his? But then, there is also the mysterious Sir Archibald from his past that he has to consider? Who is he? Is he working for him? How does the cat fit into the story? I cannot really say more without giving away to much of the book. You will have to read it.
