This thought experiment reveals the complexity of morality by distinguishing between killing a

person and letting them die – a problem with implications to our laws, behavior, science, policing ...

Thought Probes by Nicholas D. Smith and Fred D. Miller ...

Thought experiments should, just like experiments in science, be free from confounding variables - otherwise it is unclear what it is that you are testing. The process of isolating all potentially confounding variables is the reason why the scenarios in thought experiments are often highly abstract or "far fetched", not like any situations that we would expect to encounter in real life.

"Exploratory experimentation" as a probe into the relation ...

Science gave philosophy a way of empirically testing theories and concepts, whilst philosophy has helped to develop the scientific method used today. Philosophy also dictates what areas science can and cannot test, delineating the boundary between physical and metaphysical questions.
