Burmese Days is George Orwell's first novel, originally published in 1934. Set in British

Burma during the waning days of the British empire, when Burma was ruled from Delhi as part of British India, the novel serves as a portrait of the dark side of the British Raj. At the center of the novel is John Flory, trapped within a bigger system that is undermining the better side of human nature. The novel deals with indigenous corruption and imperial bigotry in a society where natives peoples were viewed as interesting, but ultimately inferior. Includes a

bibliography and brief bio of the author.

Visible Learning for Teachers Routledge

Providing clear, pedagogical steps and curriculum guidance, this practical book focuses on laying the strong foundation that is needed to assist learners in using English as the language of learning and teaching (LoLT) from grade four onward. In grade four, the majority of learners make the transition from their home language to English as the LoLT; to assist learners in this transition, it is important that teachers introduce English into the classroom from as early as Grade R (reception year, prior to starting grade one). The earlier learners are

exposed to English, the more proficient they will become. Included in this book are strategies for introducing English into the classroom, techniques for teaching English alongside learners' home language, teaching resources for classroom use, and ideas for planning lessons.

Implementing Inclusive Education Facts On File

Curriculum and Assessment is the first volume of a new series International Perspectives on Curriculum. This edited book examines the relationship between

curriculum, pedagogy and assessment, and, as with subsequent volumes, adopts a cross-sector and comparative approach.

Contributors make reference to a number of important debates in the fields of curriculum and assessment: summative versus formative assessment; differentiation versus inclusion; psychometric versus holistic theorising; decontextualised versus contextualised assessment; symbol-processing versus

<p>situated learning approaches; integrated versus connected assessment; and high stakes versus low stakes assessment. The rationale for this volume is not to reach an agreement about assessment and curriculum frameworks, but to air the various debates referred to above and develop new frameworks for understanding these important issues. This volume and the series is timely as administrators and policy-makers in different parts of the world have taken an increased</p>	<p>interest in education, and as moves to centralise curriculum provision have gathered pace. This has in some cases driven a wedge between curriculum theory and curriculum practice, as policy-makers have developed and implemented proposals without referring to academic debates about these issues. It therefore is an important task to reassert the need to discuss and debate the curriculum in a critical manner before implementation occurs. This</p>	<p>volume sets about that task, addressing policy-makers, administrators, teachers and the research community. "Ghost Dances" Study Notes HSRC Press This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target audience does not only consist of scholars in the field of self-directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the

latest body of scholarship in terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central theme, following on the work done in Volume 1 of this series (Self-Directed Learning for the 21st Century: Implications for Higher Education) to form a rich knowledge bank of work on self-directed learning. Practical help for providing balanced, comprehensive literacy instruction for all students, particularly those from culturally diverse backgrounds and those who are struggling with reading and writing. This popular resource provides comprehensive, balanced, practical literacy instruction for all students in today ' s increasingly diverse classrooms, especially students from culturally diverse backgrounds and those struggling with reading and writing. As the

Common Core raises the bar for all children, Classrooms That Work helps educators meet the challenges by presenting lesson frameworks for providing reading and language arts instruction that helps all children achieve their highest literacy levels. In a clear, friendly writing style, the authors emphasize the importance of promoting the integration of phonics and literature-based process writing and reading instruction to enhance all students ' learning

and reading skills. The book clarifies concepts, defines key terms, and offers just the right balance of research and practical coverage to make the content complete without being overwhelming. A Grain of Wheat Wildside Press LLC This monograph reports on South Africa's performance in TIMMS 2003 relative to 50 other countries; describes the performance of different groups of learners in South Africa; and provides

contextual information about teachers, schools and the curriculum. The report concludes with recommendations for strategic interventions to improve South African learners' performance in mathematics and science. The findings contained in this report offer valuable insights to academics, policymakers, curriculum-planners and teachers and those involved in the development of education in South Africa.
