Rogue Forces HarperCollins UK  
In the spring of 2017, the U.S. economy is rebounding under President Stacy Anne Barbeau, the country's first female president. But her leadership is about to be severely tested: Russian president Gennadiy Gryzlov has sent Special Troops, disguised as pro-Russian activists,

into Ukraine and Moldova. Though NATO is outraged, its response is tepid. Refusing to let Russian aggression go unpunished, former U.S. president Kevin Martindale approaches Polish president Peter Wilk with a radical solution: a counterattack using a covert force of Cybernetic Infantry Device (CID): manned robots. Underwritten by the wealthy Wilk, Operation Iron Wolf is launched—without the knowledge of the Americans or its NATO partners. The CID's initial strikes are successful, infuriating Gryzlov and propelling President Barbeau to pledge western help to investigate the attack. With

international tensions at the boiling point, Martindale's secret alliance, supported by the best military technology, is determined to outmaneuver the Russians. In this battle that will determine the fate of Eastern Europe, just which side will win?

Shadow Command HarperCollins UK  
First in a new series from New York Times bestselling author Dale Brown, featuring U.S. Air Force intelligence officer Nick Flynn on the hunt for Russian commandos in the mountains of Alaska. After a CIA covert mission goes badly awry, U.S. Air Force intelligence officer Nicholas Flynn is exiled to guard a remote radar post along Alaska's Arctic frontier. This dead-end assignment is designed to put his career permanently on ice, but Flynn's not the type to fade quietly into obscurity... As winter storms pound Alaska and northern Canada, Russian aircraft begin penetrating deep into friendly airspace. Are these rehearsals for a possible first strike, using Russia's new long-range stealth cruise missiles? Or is some other motive driving the Kremlin to take ever-increasing risks along the hostile Arctic frontier separating two of the world's great powers? When an American F-22 collides with one of the Russian

interlopers, things go south fast—in seconds, missiles are fired. There are no survivors. Despite horrific weather, Flynn and his security team are ordered to parachute into the area in a desperate bid to reach the crash sites ahead of the Russians. Soon they're caught in a deadly game of hide-and-seek with Spetsnaz commandos operating covertly on American soil. It seems that the F-22s and their Russian counterparts aren't the first aircraft to have gone missing in these desolate mountains. As Russia and the U.S. square off on the brink of all-out-war, it's up to Nick to find the missing bomber...and prevent a potential nuclear holocaust.

The first book about SEAL Team Six and Bin Laden America's most secret Special Forces unit does not even have a name. Formed as the 'Intelligence Support Activity', it has had a succession of innocuous titles to hide its ferocious purpose. It exists to 'undertake activities only when other intelligence or operational support elements are unavailable or inappropriate'. Translated from Pentagon-speak, this means operating undercover in the world's most dangerous places, penetrating enemy organizations including Al Qa'eda, Hamas and Islamic Jihad. 'The Activity' combines the spy work of the CIA with the commando/SAS role of the Green Berets. It not only provides the intelligence on the ground - it translates it into 'direct action'. This is the unit that located Saddam Hussein, and recently led the intelligence operation that found and killed Osama Bin Laden. This is the untold story behind the world's most secret Special Operations organisation. Tiger's Claw Trident E-Book Distribution Services

Sun and Moon and can sometimes be seen during the day. Originally designed as an orbiting laboratory and engineering facility for classified military projects such as advanced communications and sensors, its newest project, designed by physicist and engineer Dr. Ann Page, is called Skybolt: a megawatt-class laser. Combined with Silver Tower's advanced sensors, once experiments are completed it will be capable of engaging targets several hundred miles in all directions. The Soviet Union claims Skybolt is a violation of the Outer Space Treaty, which forbids weapons of mass destruction on the Moon or in Earth orbit. The station's commander, Brigadier-General Jason Saint-Michael, insists that Skybolt is not a weapon at all but a technology demonstrator. But the Soviet Union isn't buying that excuse for a moment, and they activate an experimental project of their own: the Elektron spaceplane, capable of carrying offensive and defensive weapons. The arms race has moved to Earth orbit...and it's becoming deadlier by the moment.

the decades have become a potent part of American popular culture. Since most Americans first discovered these songs in their youth, they hold a special place in one's consciousness. The Disney Song Encyclopedia describes and discusses hundreds of famous and not-so-famous songs from Disney films, television, Broadway, and theme parks from the 1930s to the present day. Over 900 songs are given individual entries and presented in alphabetical order. The songwriters and original singers are identified, as well as the source of the song and other venues in which it might have been used over the years. Notable recordings of the song are also listed. But most important, the song is described and what makes it memorable is discussed. This is not a reference list but a true encyclopedia of Disney songs. The book also contains a preface describing the criteria for selecting the songs, a glossary of song terms, a list of all the Disney songs and their sources, a songwriter's directory in which every song by each composer/lyricist is listed, a bibliography, a guide to recordings and DVDs of Disney productions, and an index of people and

titles.

The People's Republic of China has launched a terrifying attack against Taiwan. Cold. Swift. Deadly. Until aerial strike warfare expert Patrick McLanahan and genius Jon Masters come to into the picture. Together, they have created a monster—the EB-52 Megafortress. A high-tech display of weaponry, fully equipped with stealth cruise missiles. The most sophisticated bomber the world has ever seen. The unsinkable “flying battleship.” Now China is on its way to a nuclear high noon. And the Doomsday clock is ticking. Kill Decision Tyndale House Publishers, Inc. Peter Cappelli confronts the myth of the skills gap and provides an actionable path forward to put people back to work. Even in a time of perilously high unemployment, companies contend that they cannot find the employees they need. Pointing to a skills gap, employers argue applicants are simply not qualified; schools aren't preparing students for jobs; the government isn't letting in enough high-skill immigrants; and even when the match is right,

---

prospective employees won't accept jobs at the wages offered. In this powerful and fast-reading book, Peter Cappelli, Wharton professor and director of Wharton's Center for Human Resources, debunks the arguments and exposes the real reasons good people can't get hired. Drawing on jobs data, anecdotes from all sides of the employer-employee divide, and interviews with jobs professionals, he explores the paradoxical forces bearing down on the American workplace and lays out solutions that can help us break through what has become a crippling employer-employee stand-off. Among the questions he confronts: Is there really a skills gap? To what extent is the hiring process being held hostage by automated software that can crunch thousands of applications an hour? What kind of training could best bridge the gap between employer expectations and applicant realities, and who should foot the bill for it? Are schools really at fault? Named one of HR Magazine's Top 20 Most Influential Thinkers of 2011, Cappelli not only changes the way we think about hiring but points the way forward to rev America's job engine again.
