75th birthday. The present three-volumes liber amicorum, several years in gestation, honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaacov's research has had a major impact not only within the walls of academia, but also in the daily life of lay users of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s, a project in which he is currently involved is proving to be a sensation, as will become apparent from what follows. Yaacov Choueka began his research career in the theory of computer science, dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages, Yaacov moved to natural languages. He was a founder of natural-language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role, together with Aviezri Fraenkel, in the development of the Responsa Project, one of the earliest fulltext retrieval systems in the world. More recently, he has headed the Friedberg Genizah Project, which is bringing the treasures of the Cairo Genizah into the

Digital Age. This third part of the three-volume set covers a range of topics related to language, ranging from linguistics to applications of computation to language, using linguistic tools. The papers are grouped in topical sections on: natural language processing; representing the lexicon; and neologisation.

The Software Encyclopedia 2000 Routledge Text-to-Speech Synthesis provides a complete, end-to-end account of the process of generating speech by computer. Giving an in-depth explanation of all aspects of current speech synthesis technology, it assumes no specialised prior knowledge. Introductory chapters on linguistics, phonetics, signal processing and speech signals lay the foundation, with subsequent material explaining how this knowledge is put to use in building practical systems that generate speech. Including coverage of the very latest techniques such as unit selection, hidden Markov model synthesis, and statistical text analysis, explanations of the more traditional techniques such as format synthesis and synthesis by rule are also provided. Weaving together the various strands of this multidisciplinary field, the book is designed for graduate students in electrical engineering, computer science, and linguistics. It is also an ideal reference for practitioners in the fields of human communication interaction and telephony.

Physical Education and Sport Springer Nature This book constitutes the refereed proceedings of the 11th International Conference of the CLEF Association, CLEF 2020, held in Thessaloniki, Greece, in September 2020.* The conference has a clear focus on experimental information retrieval with special attention to the challenges of multimodality, multilinguality, and interactive search ranging from unstructured to semi structures and structured data. The 5 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 9 submissions. This year, the contributions addressed the following challenges: a large-scale evaluation of translation effects in academic search, advancement of assessor-driven aggregation methods for efficient relevance assessments, and development of a new test dataset. In addition to this, the volume presents 7 "best of the labs" papers which were reviewed as full paper submissions with the same review criteria. The 12 lab overview papers were accepted out

of 15 submissions and represent scientific challenges based on new data sets and real world problems in multimodal and multilingual information access. * The conference was held virtually due to the COVID-19 pandemic.

The African Film Industry Springer Nature
A completely updated, revised edition of the classic, outfitted with a whole new arsenal of indispensable knowledge on global affairs, popular culture, economic trends, scientific principles, and modern arts.

Here's your chance to brush up on all those subjects you slept through in school, reacquaint yourself with all the facts you once knew (then promptly forgot), catch up on major developments in the world today, and become the Renaissance man or woman you always knew you could be! How do you tell the Balkans from the Caucasus? What's the difference between fission and fusion? Whigs and Tories? Shiites and Sunnis? Deduction and induction? Why aren't all Shakespearean comedies necessarily thigh-slappers? What are transcendental numbers and what are they good for?

What really happened in Plato's cave? Is postmodernism dead or just having a bad hair day? And for extra credit, when should you use the adjective continual and when should you use continuous? An Incomplete Education answers these and thousands of other questions with incomparable wit, style, and clarity. American Studies, Art History, Economics, Film, Literature, Music, Philosophy, Political Science, Psychology, Religion, Science, and World History: Here's the bottom line on each of these major disciplines, distilled to its essence and

served up with consummate flair. In this revised edition you'll find a vitally expanded treatment of international issues, reflecting the seismic geopolitical upheavals of the past decade, from economic free-fall in South America to Central Africa's world war, and from violent radicalization in the Muslim world to the crucial trade agreements that are defining globalization for the twenty-first century. And don't forget to read the section "A Nervous American's Guide to Living and Loving on Five Continents" before you answer a personal ad in the International Herald Tribune. As delightful as it is illuminating, An Incomplete Education packs ten thousand years of culture into a single superbly readable volume. This is a book to celebrate, to share, to give and receive, to pore over and browse through, and to return to again and again.

Latin America at 200 University Press of Amer Ryan Knighton's humorous and perceptive tales of fatherhood take us inside an unusual new family, one bound by its father's particular darkness and light. C'mon Papa is Ryan Knighton's heartbreaking and hilarious voyage through the first year of fatherhood. Becoming a father is a stressful, daunting rite of passage to be sure, but for a blind father, the fears are unimaginably heightened. Ryan will have to find novel ways to adapt to nearly every aspect of parenting: the most basic skills are nearly impossible to contemplate, let alone master. And how will Ryan get to know

this pre-verbal bundle of coos and burps when he can't see her smile, or look into her eyes for hints of the person to come? But this is no pity party, and Ryan has no time for sentimentality. Tackling these hurdles with grace and humour, Ryan is determined to do his part - and this is where the fun starts. From holding his daughter as she wails into the night to their first nerve-wracking walk to the cafe, no activity between father and daughter is without its pitfalls. In his struggle to "see" Tess, Ryan reimagines the relationship between father and child during that first chaotic year.

In this book, the leaders of the Speech Technology Group at Microsoft Research share these advances -- presenting not just the latest theory, but practical techniques for building commercially viable products.KEY TOPICS: Spoken Language Processing draws upon the latest advances and techniques from multiple fields: acoustics, phonology, phonetics, linguistics, semantics, pragmatics, computer science, electrical engineering, mathematics, syntax, psychology, and beyond. The book begins by presenting essential background on speech production and perception, probability and information theory, and pattern recognition. The authors demonstrate how to

extract useful information from the speech signal; then present a variety of contemporary speech recognition techniques, including hidden Markov models, acoustic and language modeling, and techniques for improving resistance to environmental noise. Coverage includes decoders, search algorithms, large vocabulary speech recognition techniques, text-to-speech, spoken language dialog management, user interfaces, and interaction with non-speech interface modalities. The authors also present detailed case studies based on Microsoft's advanced prototypes, including the Whisper speech recognizer, Whistler text-to-speech system, and MiPad handheld computer.MARKET: For anyone involved with planning, designing, building, or purchasing spoken language technology. *Report of the Librarian of Congress* Otto Harrassowitz Verlag Violent internal conflicts are the predominant form of warfare in the world today, and there is an urgent need to understand their causes and find ways for their prevention or resolution. The 15 essays collected here present a variety of perspectives, conceptions, arguments, and conclusions regarding ethnicity, power, and conflict in the contemporary world. Scholars from Africa, Europe, Asia, and North America explore conflicts and conflict resolution approaches in regions of the former Soviet Union, the Horn of Africa, India, the Basque region of Spain, the former Yugoslavia, Northern Ireland, and the United States. The cases that are presented here reveal the

complexity of conflict and the variety of factors and motives underlying the resurgence of ethnicity and the shifting power relationships of the post-Cold War world, and they demonstrate that the solutions will at times necessarily be complex and various. Readers of this timely study will discover a wide geographic and experiential range and a rich and lively debate among the essays on one of the most urgent dilemmas of the contemporary world. dictionary Purdue University Press From the mid-nineteenth century to the present, Ethiopian society has been in a state of major transition. The author thoroughly examines the history, politics, economics, and sociology of ancient and contemporary Ethiopian society. Ethiopia: The Political Economy of Transition also systematically documents the recent Ethiopian experience as it unfolded from

the 1974 revolution to the present. Without prejudice to any political group that was involved in the revolution, the book analyzes the role of political actors in the mass uprising. Contents: The Political Economy of Ethiopia: 1855-1916; Haile Selassie's Government and the Ethiopian Student Movement; The Anatomy of the Spontaneous Revolutionary Upsurge; The Ethiopian Peoples

Revolutionary Party (EPERP) and the Ethiopian Left; The Question of Nationalities in a Historical Ethiopian Context; Ethiopian Transition Under the Messenger of Change; The Political Economy of Transition After Derg; Index. Great Book of World Facts, Lists and Quizzes UNESCO Publishing Global Media Giants takes an in-depth look at how media corporate power works globally, regionally, and nationally, investigating the ways in which the largest and most powerful media corporations in the world wield power. Case studies examine not only some of the largest media corporations (News Corp., The Microsoft Corporation) in terms of revenues, but also media corporations that hold considerable power within national, regional, or geolinguistic contexts (Televisa, The Bertelsmann Group, Sony Corporation). Each chapter approaches a different corporation through the lens of economy, politics, and culture, giving students and scholars a thoughtful and data-driven guide with which to interrogate contemporary media industry power. This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities -

Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. In much of what has been written about Africa ... Little is ever shown of indigenous

African democratic systems, under which there is distribution of authority and responsibility across various strata of society, and where warriors are subordinated to deliberative assemblies, customary laws are revised periodically by a national convention, and elected leaders are limited to a single eight-year terms of office and subjected to public review in the middle of their term. All these ideals and more are enshrined in the five-century old constitution of the Oromo of Ethiopia, which is the subject matter of this book. In this book, Legesse brings into sharp focus the polycephalous or "multi-headed" system of government of the Oromo, which is based on clearly defined division of labor and checks and balances between different institutions. Revealing the inherent dynamism and sophistication of this indigenous African political system, Legasse also shows in clear and lucid language that the system has had a long and distinguished history, during which the institutions changed by deliberate legislation, and evolved and adapted with time.
