Q: My tile installer recently told me that he

wanted to use caulk in the corners of a tiled shower instead of grout. Is that necessary? The key word in this recommendation is “technically.” Clearly, the TCNA recognizes that many tile installers use grout alone to seal shower corners. But the ...

CHANGES TO THE 2015 TCNA HANDBOOK - Custom Building Products

Most tile membranes are also designed to provide waterproofing if installed according to specifications. TCNA does still show a single-layer ¾” T&G subfloor with an uncoupling membrane (F148), but I don’t know anyone in the tile industry who advocates a single-layer plywood substrate for ceramic tile or stone.

Home - The Tile Council of North America such tiles installed in heavy commercial applications over many years, often with very little evidence of wear after many years of heavy foot traffic, although some of the darker tiles scored as low as class 2 in the C1027 test. Tile Q&A By Katelyn Simpson Tile Abrasion: ASTM C1027 and Possible Upcoming Changes

Tile Q&A

What TCNA installation number would you recommend for thin-set quarry tile on concrete slab-on-grade? I realize

it’s typically thick-set, but was looking for an alternate. ... TCNA F113-15 is an on-ground concrete slab ceramic tile thin-set application for a basic application that does not require epoxies or membranes.

Q & A With NTCA Technical Trainer Mark Heinlein - TileLetter

Q: What is the best way to install tile?
A: Like movement joints, the installation used depends on the type of tile, site conditions and substrates.
