Timber Tools

The Timber Frame Engineering Council (TFEC) formed in 2005 at a

Guild conference in recognition of the considerable number of

structural engineers among the Guild membership and in response

to a felt need for systematic research, discussion, and codification of

timber frame joinery and structural practices.

Timber frame buildings: a guide to the construction process

At its most basic, a timber frame structure features walls consisting of

timber studwork fixed in place (typically) with OSB or plywood. The

strength and rigidity is supplied by the board, which, when nailed to the

studwork, makes a very rigid box known as an open panel — the panel is

' closed ' once insulation has been introduced.
