The Origins of Beowulf Cambridge University Press

This book suggests that the Old English epic Beowulf was composed in the winter of 826-7 as a requiem for King Beornwulf of Mercia on behalf of Wiglaf, the ealdorman who succeeded him. The place of composition is given as the minster of Breedon on the Hill in Leicestershire (now Derbyshire) and the poet is named as the abbot, Eanmund. As well as pinpointing the poem's place and date of composition, Richard North raises some old questions relating to the poet's influences from Vergil and from living Danes. Norse analogues are discussed in order to identify how the poet changed his heroic sources while four episodes from Beowulf are shown to be reworked from passages in Vergil's Aeneid. One chapter assesses how the poem's Latin sources might correspond with what is known of Breedon's now-lost library while another seeks to explain Danish mythology in Beowulf by arguing that Breedon hosted a meeting with Danish Vikings in 809. This fascinating and challenging new study combines careful detective work with meticulous literary analysis to form a case that no future investigation will be able to ignore.

Noah's Flood is one of the Bible's most popular stories, and flood myths survive in many cultures today. This book presents the first comprehensive examination of the incorporation of the Flood myth into the Anglo-Saxon imagination. Focusing on literary representations, it contributes to our understanding of how Christian Anglo-Saxons perceived their place in the cosmos. For them, history unfolded between the primeval Deluge and a future – perhaps imminent – flood of fire, which would destroy the world. This study reveals both an imaginative diversity and shared interpretations of the Flood myth. Anglo-Saxons saw the Flood as a climactic event in God's ongoing war with his more rebellious creatures, but they also perceived the mystery of redemption through baptism. Anlezark studies a range of texts against their historical background, and discusses shifting emphases in the way the Flood was interpreted for diverse audiences. The book concludes with a discussion of Beowulf, relating the epic poem's presentation of the Flood myth to that of other Anglo-Saxon texts.

A Finding-list of History, Politics, Biography, Geography, Travel and Anthropology in the Young Men's Library at Buffalo Infobase Publishing "It is well known that the Old English poem Beowulf begins and ends with funerals and includes a third as a digression part way through. Now, for the first time, a fourth funeral (hitherto disguised as poetic imagery) is identified from archaeological evidence. A detailed analysis of the four funerals establishes their thematic and structural importance, revealing them as pillars around which the poem is built. The port is shown to be a

literate antiquarian of considerable structural skill; one who explores feminist issues, plays with numbers and enjoys a pun; who establishes an ideal then probes its darker side." "This book will be invaluable to all students of the poem for its fresh and detailed reading, its identification of a coherent structure and its establishment of the integrity of the surviving text."--BOOK JACKET. In the present volume, the two essays that frame the book provide exciting insight into the mental world of the Anglo-Saxons by showing on the one hand how they understood the processes of reading and assimilating knowledge and, on the other, how they conceived of time and the passage of the seasons. In the field of art history, two essays treat two of the best-known Anglo-Saxon manuscripts. The lavish symbol pages in the 'Book of Durrow' are shown to reflect a programmatic exposition of the meaning of Easter,

and a posthumous essay by a distinguished art historian shows how the Anglo-Saxon illustrations added to the 'Galba Psalter' are best to be understood in the context of the programme of learning instituted by King Alfred. The usual comprehensive bibliography of the previous year's publications in all branches of Anglo-Saxon studies rounds off the book.

Beowulf is the oldest and most complete epic poem in any non-Classical European language. Our only manuscript, written in Old English, dates from close to the year 1000. However, the poem remained effectively unknown even to scholars until the year 1815, when it was first published in Copenhagen. This impressive volume selects over one hundred works of critical commentary from the vast body of scholarship on Beowulf -

including English translations from German, Danish, Latin and Spanish - from the poem's first mention in 1705 to the Anglophone scholarship of the early twentieth century. Tom Shippey provides both a contextual introduction and a guide to the eighteenth- and nineteenth-century scholarship which generated these Beowulf commentaries. The book is a vital document for the study of one of the major texts of 'the Northern renaissance', in which completely unknown poems and even languages were brought to the attention first of the learned world and then of popular culture. It also acts as a valuable guide to the development of nationalist and racist sentiment, beginning romantically and ending with World War and attempted genocide.

Dick Ringler's deceptively simple translation captures the rhythm, movement, and power of the original Old English poem while employing a fluid modern English style and a relatively spare vocabulary. His generous Introduction, a lively yet masterly guide to the work, along with his translations of three shorter Old English poems elucidate a major English text almost as well-known for its subtlety and intricacy as it is for its monsters and heroes.
