The 1st Edition of Time-Saver Standards for Building Types has been an important part of my professional library since its publication in 1973. As stated in its preface: "It is intended to give basic design criteria for each major type of building. It will give those unfamiliar with a

specific building type a talking or working knowledge of its functions, organization, and major components." Over the years, I have referred to Time-Saver frequently for planning and design guidelines for building types such as gymnasiums, airport terminals, and police stations. But as the 1st Edition is now 17 years old and much of it is based on other even older versions of Time-Saver Standards, I have begun to find the book inadequate for contemporary design practice. The past two decades have been a period of profound change for building planning and design. Many building requirements have changed and entire new categories of buildings have evolved. It was with enthusiasm that I looked forward to the 3rd Edition; which the publisher promised would be "revised, expanded, and completely brought up to date." I am greatly disappointed with the result. While the 3rd Edition has been expanded to approximately 1400 pages, nearly a third more than the 1st Edition, little of the original material has been revised and the updating has been insufficient. *Time Saver Standards for Architectural Design 8/E (EBOOK)* Tata McGraw-Hill Education

Glamorous fashions, personalities, and places captured by iconic photographer Slim Aarons Slim Aarons, at least according to the man himself, did not photograph fashion: "I didn't do fashion. I did the people in their clothes that became the fashion." But despite what he claimed, Aarons's work is indelibly tied to fashion. Aarons's incredibly influential photographs of high society and socialites being unambiguously

themselves are still a source of inspiration for modern day style icons. Slim Aarons: Style showcases the photographs that both recorded and influenced the luminaries of the fashion world. This volume features early black-and-white fashion photography, as well as portraits of the fashionable elite—like Jacqueline de Ribes, C.Z. Guest, Nan Kempner, and Marisa Berenson—and those that designed the clothes, such as Oscar de la Renta, Emilio Pucci, Mary McFadden, and Lilly Pulitzer. Featuring some never-before-seen images and detailed captions written by fashion historians, Slim Aarons: Style is a collection of the photographer's most stylish work.
