Challenging the popular myth of a present-day 'information revolution', Media Technology and Society is essential reading for anyone interested in the social impact of technological change. Winston argues that the development of new media forms, from the telegraph and the telephone to computers, satellite and virtual reality, is the product of a constant play-off between social necessity and suppression: the unwritten law by which new technologies are introduced into society only insofar as their disruptive potential is limited.

The Everything Store Apress

Thirty years ago, Alan, Patrick, and Guinevere-"the Trio"-became the best of friends while stealing from Checker's Casual Cafe, the busiest restaurant in town. But the trio didn't just take money-what happened in '91 was no less than diabolical. Cicadas attacked customers, out-of-hand pranks collapsed the kitchen ceiling, and the Phantom of the Restaurant brought havoc to the dining room-all against a background of blaring eighties music. Sharon Donovan, the restaurant's general manager, was literally ready to kill someone when police were finally called. Fifteen years later, Guinevere is mortally wounded in a horrific car accident. As Alan and Patrick rush to her side, her deathbed confession is chilling: "The worst thing about my depression is that it has a sense of humor." In her dying breath, Gwen asks Alan to take care of Stephanie, her teenage daughter-"As you once took care of me, when we all worked together at Checker's." And as Steph brings back memories of the best time in his life, Alan makes a very bad decision... But karma is a bitch, and Patrick's arrest on returning to his Nevada home makes national news. His frantic cry for help sends Alan and Stephanie on a cross-country trip-where evidence reveals a disturbing

connection between the Trio that began years before Checker's. It's eerie how current events mirror those from decades ago, and past-and-present stories play out side by side. Without Alan's help, Patrick will go to prison...but as Sharon Donovan learned the hard way, it's often those you trust the most who blindside you with their behaviors... No matter how far you run, the past will always catch up with you. And once it does, it will serve a dish best cold.

A Man Named Dave, which has sold over 1 million copies, is the gripping conclusion to Dave Pelzer 's inspirational and New York Times bestselling trilogy of memoirs that began with A Child Called "It" and The Lost Boy. "All those years you tried your best to break me, and I'm still here. One day you'll see, I'm

going to make something of myself." These words were Dave Pelzer's declaration of independence to his mother, and they represented the ultimate act of self-reliance. Dave's father never intervened as his mother abused him with shocking brutality, denying him food and clothing, torturing him in any way she could imagine. This was the woman who told her son she could kill him any time she wanted to—and nearly did. The more than two million readers of Pelzer's New York Times and international bestselling memoirs A Child Called "It" and The Lost Boy know that he lived to tell his courageous story. With stunning generosity of spirit, Dave Pelzer invites readers on his journey to discover how he turned shame into pride and rejection into acceptance. Digital media everyday inscribe new patterns of time, promising instant communication, synchronous collaboration, intricate time management, and profound new advantages in speed. The essays in this volume reconsider these outward interfaces of convenience by calling attention to their supporting infrastructures, the networks of digital time that exert pressures of conformity and standardization on the temporalities of lived experience and have important ramifications for social relations, stratifications of power, practices of cooperation, and ways of life. Interdisciplinary in method and international in scope, the volume draws together insights from media and communication studies, cultural studies, and science and technology studies while staging an important encounter between two distinct approaches to the temporal patterning of media infrastructures, a North American strain emphasizing the social and cultural experiences of lived time and a European tradition, prominent especially in Germany, focusing on technological time and time-critical processes.

Now a major motion picture directed by Martin Scorsese and starring Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sank a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids waiting at home and the fast-talking, hard-partying young stockbrokers who called him king, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called the Wolf of Wall Street. In the 1990s, Belfort became one of the most infamous kingpins in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power, and excess that no one could invent: the tale of an ordinary guy who went from hustling Italian ices to making hundreds of millions—until it all came crashing down. Praise for *The Wolf of Wall Street* “Raw and frequently hilarious.” —The New York Times “A rollicking tale of [Jordan Belfort's] rise to riches as head of the infamous boiler room Stratton Oakmont . . . proof that there are indeed second acts in American lives.” —Forbes “A cross between Tom Wolfe's *The Bonfire of the Vanities* and Scorsese's *GoodFellas* . . . Belfort has the Midas touch.” —The Sunday Times (London) “Entertaining as pulp fiction, real as a federal indictment . . . a hell of a read.” —Kirkus Reviews

This influential book establishes the enduring vocabulary and concepts in the burgeoning field of knowledge management. It serves as the hands-on resource of choice for companies that recognize knowledge as the only sustainable source of competitive advantage going forward. Drawing from their work with more than thirty knowledge-rich firms, Davenport and Prusak--experienced consultants with a track record of success--examine how all types of companies can effectively understand, analyze, measure, and manage their intellectual assets, turning corporate wisdom into market value. They categorize knowledge work into four sequential activities--accessing, generating, embedding, and transferring--and look at the key skills, techniques, and processes of each. While they present a practical approach to cataloging and storing knowledge so that employees can easily leverage it throughout the firm, the authors caution readers on the limits of communications and information technology in managing intellectual capital. *Psychiatric Nurse of the Century* Simon and Schuster

The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the *Seattle Times* as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. *The Everything Store* is the revealing, definitive

biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

“The wonderful cathedral of Notre-Dame de Paris, one of the greatest achievements of European civilization, was on fire. The sight dazed and disturbed us profoundly. I was on the edge of tears. Something priceless was dying in front of our eyes. The feeling was bewildering, as if the earth was shaking.” —Ken Follett “[A] treasure of a book.” —The New Yorker In this short, spellbinding book, international bestselling author Ken Follett describes the emotions that gripped him when he learned about the fire that threatened to destroy one of the greatest cathedrals in the world—the Notre-Dame de Paris. Follett then tells the story of the cathedral, from its construction to the role it has played across time and history, and he reveals the influence that the Notre-Dame had upon cathedrals around the world and on the writing of one of Follett's most famous and beloved novels, *The Pillars of the Earth*. Ken Follett will donate his proceeds from this book to the charity La Fondation du Patrimoine.

Here, There and Everywhere Penguin UK Daylight saving time has been described as one of the most controversial issues in modern history. This encyclopedia of daylight saving time commemorates 100 years of the scheme since it was first introduced nationally in 1916 by European countries on both sides of World War I to save fuel. The book examines the origins of daylight saving, including the historical development of calendars, clocks, standard time, and the idea of changing the clock to give more daylight late in the day. It looks at the history of daylight saving in every country that has ever used the measure. It also analyses daylight saving in each state of the US, Australia and Brazil, and each Canadian province. It features many intriguing and often prolonged battles between advocates and critics of daylight saving in countries around the world, as well as lighter moments. It highlights the determination of daylight saving time champions such as the UK's William Willett, the US's Robert Garland and Harley Staggers, New Zealand's Thomas Sidey and Tasmania's John Steer. It delves into the chaotic daylight saving situations that emerged, notably in the US and Canada, but also elsewhere. Every country and sometimes each state has a different and usually controversial story to tell.
