Rainwater Harvesting for Drylands and Beyond Penguin Part memoir, part architectural history, Chasing Frank Lloyd Wright will interest architecture buffs, local historians, KU alumni, students and anyone who

enjoys a lively coming-of-age tale. Set in the 1950s, Chasing Frank Lloyd Wright follows the author from his days as a hot-rodding teenager in an oil rich Oklahoma town to his transformation into a dedicated student of architecture, following the Organic Architecture trail laid down by Mr. Wright. Like most college students the author struggled to balance his extra-curricular activities with his studies, though his distractions included many chance encounters and friendships with celebrities: jazz singer Nellie Lutcher, Afro-Cuban percussionist Candido, band leader Stan Kenton, Regional painter, Thomas Hart Benton, KU basketball star, Wilt Chamberlain

to name a few. The author reflects on the life and philosophy of Frank Lloyd Wright, interweaving Wright's development with his own. Dozens of vintage photographs taken at the time and place by the author document many important works by Wright, Bruce Goff and others as they appeared in the 1950s along with scenes of Lawrence, the KU Campus, Bartlesville and Norman Oklahoma, Taliesin Wisconsin and surrounding areas. This memoir tells the back story of how this young architect, who dreamed of following in the footsteps of his idol came to forge his own identity that while indebted to Wright, was uniquely his own.

"In 2004, Lloyd Kahn
discovered a group of unique
carpenters along the Pacific
Coast of North America. Over a
two-year period, he made four
trips north from his home in the
San Francisco Bay Area, up the
coast, shooting the photos that
appear in this book." "To
preserve homeowners' privacy,
specific locations are not given,
but suffice to say this book
focuses on the Pacific Coast

north from San Francisco up to and around Vancouver Island, British Columbia, latitudes 37 to 49 degrees." "There's been a vortex of creative carpentry energy in this part of the world over the last 30 years. Many of the builders shown here got started in the countercultural era of the '60s and '70s, and their work has never been shown in books or magazine articles."--BOOK JACKET.

A brief introduction to the construction and history of basic shelters. Shelter is one of our most basic needs, and throughout history mankind has been highly inventive in meeting it. Simple Shelters introduces the principal types of wooden and stick-frame structures built around the world, examining how their shape and form reflect cultural and cosmological considerations as well as climatic and utilitarian needs. Charting the gradual

shift from the circular homes of the nomads to the rectangular ones favored by settled people, Jonathan Horning explores materials and construction principles over millennia, including the geodesic experiments of the twentieth century.

Fascinating and unique, Wonderful Houses Around the World gives children a welcome entrée into other places and other lives throughout the world.

Glorious two-page photographic spreads capture families outside their homes, be they simple or imposing. Detailed cutaway illustrations reveal the inside of each house, showing the various family members engaged in typical daily activities. Captions explain where each house is located, the environmental conditions that affect the house design, how the family lives in the

home, and their possessions -- all providing interesting glimpses of life in other cultures. The ten houses profiled include a red mud dwelling with thatched towers in Togo, a yurt in Mongolia, a steep-roofed, shake-covered house in Transylvania, and a large donut-shaped communal building for 300 in China. This book increases children's wonder about and

cultural awareness of the many different people and ways of life around the world.
