With fisheries all over the world reaching their limits of sustainable exploitation,

there is a great need to ensure that the fish which are caught reach the consumer with minimal losses. The expansion of fishery products and attention to quality demanded by consumers requires policy-makers and fishery workers to have an understanding of the post-harvest aspects of fishery development. This book is a layman's guide to all aspects of post-harvest fisheries science and technology both in modern and traditional fisheries in many parts of the world. It is aimed at managers in government and industry, often non-specialists, who have to make decisions about post-harvest fisheries development.

A Novel Apa Publications (UK) Limited  
This open access edited book captures the complexities and conflicts arising at the interface of intellectual property rights (IPR) and competition law. To do so, it discusses four specific themes: (a) policies governing functioning of standard setting organizations (SSOs), transparency and incentivising future innovation; (b) issue of royalties for standard essential patents (SEPs) and related disputes; (c) due process principles, procedural fairness and best practices in competition law; and (d) coherence of patent policies and consonance with competition law to support innovation in new technologies. Many countries have formulated

policies and re-oriented their economies to foster technological innovation as it is seen as a major source of economic growth. At the same time, there have been tensions between patent laws and competition laws, despite the fact that both are intended to enhance consumer welfare. In this regard, licensing of SEPs has been debated extensively, although in most instances, innovators and implementers successfully negotiate licensing of SEPs. However, there have been instances where disagreements on royalty base and royalty rates, terms of licensing, bundling of patents in licenses, pooling of licenses have arisen, and this has resulted in a surge of litigation in various jurisdictions and also drawn the attention of competition/anti-trust regulators. Further, a lingering lack of consensus among scholars, industry experts and regulators regarding solutions and techniques that are apposite in these matters across jurisdictions has added to the confusion. This book looks at the processes adopted by the competition/anti-trust regulators to apply the principles of due process and procedural fairness in investigating abuse of dominance cases against innovators.

"Exhilarating . . . How often can you say about a harrowing, unquiet book that it makes you wrestle with your soul?" -Neel Mukherjee, The Times (London) It's 1948 and the Arab villagers of Khirbet Khizeh are about to be violently expelled from their homes. A young Israeli soldier who is on duty that day finds himself battling on two fronts: with the villagers and, ultimately, with his own conscience. Published just months after the founding of the state of Israel and the end of the 1948 war, the novella Khirbet Khizeh was an immediate sensation when it first appeared. Since then, the book has continued to challenge and disturb, even finding its way onto the school curriculum in Israel. The various debates it has prompted would themselves make Khirbet Khizeh worth reading, but the novella is much more than a vital historical document: it is also a great work of art. Yizhar's haunting, lyrical style and charged view of the landscape are in many ways as startling as his wrenchingly honest view of modern Israel's primal scene. Considered a modern Hebrew masterpiece, Khirbet Khizeh is an extraordinary and heartbreaking book that is destined to be a classic of world literature.

The HCMOS Pocket Guide covers all commonly used HCMOS special devices on the market. Being an independent publication, it is able to provide a uniquely comprehensive listing of HCMOS products for all major manufacturers. The HCMOS Pocket Guide also breaks new ground with the format that is clear and easy. Data which applies to the HCMOS series as a whole is not repeated for every component, but is presented in an introductory section, thereby saving a great deal of space for other vital information. Each page describes one component only and is divided into eight

sections. The first section illustrates the device schematic using a clear and simple logic diagram of the internal structure of the component. The next section contains a brief description of the component and is followed by full details on operating the component, describing input signals and levels at individual pins. This indicates how the device is controlled and its resulting output signals. The fourth section lists major applications, while the next two sections contain essential data for that particular device in abbreviated form and a list of the relevant manufacturers. The last two sections contain the device name and number, highlighted for easy reference. The HCMOS Pocket Guide extracts all the essential data from the manufacturers own data books and presents it in a clear and concise format. This guide is an e-book publication of the series containing: CMOS Pocket Guide, Part 1 (Standard components) CMOS Pocket Guide, Part 2 (Special components) TTL Pocket Guide, Part 1 (7400-74200) TTL Pocket Guide, Part 2 (74201-74640) TTL Pocket Guide, Part 3 (74641 - 7430640)

International Electronics Directory '90, Third Edition: The Guide to European Manufacturers, Agents and Applications, Part 1 comprises a directory of various manufacturers in Europe and a directory of agents in Europe. This book contains a classified directory of electronic products and services where both manufacturers and agents are listed. This edition is organized into two sections. Section 1 provides details of manufacturers, including number of employees, production program, names of managers, as well as links with other companies. The entries are listed alphabetically on a country-by-country basis. Section 2 provides information concerning agents or representatives, including names of manufacturers represented, names of managers, number of employees, and range of products handled. A number of these companies are also active in manufacturing and so appear in both Section 1 and Section 2. This book is a valuable resource for private consumers.
