Four primary tissue types interweave to form the “ fabric ” of the body. These basic tissues are epithelial (ep i-the le-ul), connec-tive, muscle, and nervous tissue, and each has numerous sub-classes or varieties. If we had to describe the general role of each primary tissue type in a single word,the words would most likely

Tissue: The Living Fabric

Is a Health Care Proxy the same as a living will? No. A living will is a document that provides specific instructions about health care decisions. You may put such instructions on your Health Care Proxy form. The Health Care Proxy allows you to choose someone you trust to make health care decisions on your behalf. Unlike a living will, a Solved: Ering A&PCourse Home CExtra Credit Ex.6 E Home Bui ... Answer. The covering and lining epithelia are classified on the basis of the shape of the cells and the number of cell layers present. The three common shapes are squamous, cuboidal, and columnar. The classes in terms of cell number are: simple (single layer) or stratified (multiple layers).

Health Care Proxy

Tissues: Tissues provide specific functions for the body and there are four main types of tissues: epithelial, connective, muscle, and nervous tissue.

Type your answers in the spaces provided below. Read the questions carefully! Epithelial Tissue: Location: Epithelial tissue is widespread throughout the body, covers organs, and lines body surfaces.
