The assessment and management of risk to society from the operation of chemical process plants and other industrial activities in which dangerous substances are produced, used, handled or stored will remain a topic of great importance in the next decade. In order to evaluate this specific risk on a qualitative and/or quantitative basis, the concepts of risk analyses are linked together in this book. The "performance based" and "goal oriented" regulatory requirements of the European Council's new "Seveso II Directive" for the identification of large scale industrial hazards, prevention of sudden and uncontrolled releases of dangerous substances from industrial plants and mitigation of serious consequences of industrial accidents to people and the environment are examined. The fact that risk assessment and management are key elements to such forms of regulation is also demonstrated. While the "Seveso II Directive" defines "what" has to be achieved on the control of major hazards involving dangerous substances within the European Union, the methods of risk assessment and management give guidance on "how" to achieve it. The text provides a practical guide for decision-makers in regulatory bodies and companies with a non-technical background. Scientists and engineers who are not yet familiar with the concepts of risk assessment and who want a survey of some fundamentals of, and principal results from, risk assessment studies and approaches primarily for applications in the context defined by the "Seveso Directives" will also find this book invaluable.

Featuring internationally renowned academics, this volume provides a snapshot of the field of applied linguistics, and illustrates how linguistics is engaging with the idea of 'context'. The book treats discourse as language in the contexts of its use in and above the level of the sentence and as systems of knowledge and beliefs. In using the term context(s), the book understands this as different situations in which discourse is produced and, on the other, how analysts construe context in their work. The volume is thus concerned with language in its context of use (little d discourse), but at the same time, more specifically, in individual chapters, with particular discourses as they are manifested in particular contexts (big D discourses). Well known discourse analysts contribute chapters focussing on different contexts with which they are familiar, viz. business, education, ethnicity and race, gender and sexuality, history, intercultural contexts, lingua franca contexts, media, place, politics, race, and the virtual world. It brings together researchers from different approaches, but all with a commitment to the study of language in context. The contributors themselves represent different approaches to discourse analysis: conversation analysis, corpus linguistics, critical discourse analysis, ethnographic discourse analysis, mediated discourse analysis, multimodal discourse analysis, systemic functional linguistics. Readers are invited to compare and contrast these different contexts and approaches.

For better plans-and better projects The complete guide to site analysis Site analysis is the key to a well-designed project. In fact, the careful and complete analysis of a site and its surrounding context can lead to better development proposals, smoother design implementation, and, ultimately, higher quality built environments. This carefully conceived book is the first to detail each crucial step in the site analysis and planning process, from site selection through design development. It shows how these activities are integrated to arrive at a site plan that successfully balances the needs of the client and other

stakeholders with the site's suitability for the intended land uses. With more than 130 illustrations, this book includes many outstanding examples of maps and site plans created by leading land planning firms. It offers guidance on: * Site identification, evaluation, and selection * Site inventories of physical, biological, and cultural attributes * Land use suitability analysis using Geographic Information Systems (GIS) * Concept planning and design development * Graphic communication with clients, government agencies, and other stakeholders Filled with need-to-know information on the entire land planning and design process, Site Analysis is a vital addition to the library of students and professionals in landscape architecture, urban design and planning, and related areas.

In The Name of Hate is the first book to offer a comprehensive theory of hate crimes, arguing for an expansion of the legal definitions that most states in the U.S. hold. Barbara Perry provides an historical understanding of hate crimes and provocatively argues that hate crimes are not an aberration of current society, but rather a by-product of a society still grappling with inequality, difference, fear, and hate.

The process-oriented guide to context-sensitive site selection, planning, and design Sustainable design is responsive to context. And each site has a unique set of physical, biological, cultural, and legal attributes that presents different opportunities and constraints for alternative uses of the site. Site analysis systematically evaluates these on-site and off-site factors to inform the design of places—including neighborhoods and communities—that are attractive, walkable, and climate-resilient. This Third Edition of Site Analysis is fully updated to cover the latest topics in low-impact, location-efficient design and development. This complete, user-friendly guide: Blends theory and practice from the fields of landscape architecture, urban planning, architecture, geography, and urban design Addresses important sustainability topics, including LEED-ND, Sustainable Sites, STAR community index, and climate adaptation Details the objectives and visualization methods used in each phase of the site planning and design process Explains the influence of codes, ordinances, and site plan approval processes on the design of the built environment Includes more than 200 illustrations and eight case studies of projects completed by leading planning and design firms Site Analysis, Third Edition is the ideal guide for students taking courses in site analysis, site planning, and environmental design. New material includes review questions at the end of each chapter for students as well as early-career professionals preparing for the ARE, LARE, or AICP exams.

LEGAL ANALYSIS AND WRITING, 4TH EDITION helps readers analyze statutes and cases and draft supporting legal memoranda. In addition to the fundamentals of good writing, legal or otherwise, the book illustrates how paralegals analyze and brief cases, identify key facts and legal issues, and apply case law and counteranalysis to legal matters, and more. Going beyond mere explanations, the book shows readers how to apply concepts to hypothetical situations, draft legal memoranda and correspondence, and scrutinize legal citations and Web research, to develop a thorough understanding of the analytical and writing responsibilities paralegals undertake. Legal Analysis and Writing, 4th Edition is a robust resource for any paralegal writing course and includes a host of available supplemental tools designed to enhance learning while simplifying instructor preparation. This text provides comprehensive, in-depth coverage of the fundamentals of legal analysis and writing. National in scope, it is designed for students who have completed introductory legal assistant courses. Chapters include examples of each concept of principle discussed and a hypothetical fact situation through which the application of the principles are illustrated.-- the use of a hypothetical at the beginning of the chapter creates student interest in the subject matter-- each chapter has a list of key points which may be used as a quick reference and checklist when applying the concepts presented-- in-depth coverage of more topics than other books on the same subject such as issue spotting, case law analysis (cases on-point), and counter analysis-- easy-to-read language that a lay person can understand.

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have

continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

The current "generalized digitization" of society is influencing the health environment, healthcare organizations as well as actors. In this context, human and social sciences deconstruct, nuance and sometimes even challenge certain preconceived ideas and/or dominant discourses. In this book, researchers of four nationalities and three different disciplines have agreed to open the "black box" of their work. They display their scientific practices from the perspective of epistemology, ethics and methodology. They present and analyze their values and postulates but, also, what may have influenced the project, the definition of the object and objectives, as well as their approaches. In a contextual way, the first part presents some changes in environments and infocommunicational practices related to digital health. The second part opens space to reflect on ethics and deontology. Finally, postulating that scientific fact is not an essence but the result of a process, the last part discusses the methods implemented, which may be different from those initially envisaged. This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them.

By many measures Enda Kenny was Fine Gael ' s most successful leader of all time, but his position as Taoiseach was thrown into turmoil in February 2017 by an explosive political scandal — one which threatened to collapse his government, and ultimately cost Kenny his job. In Enda the Road: Nine Days That Topped a Taoiseach, Gavan Reilly offers an enthralling blow-by-blow account of the Maurice McCabe scandal: how a Garda whistleblower was targeted by a national smear campaign, and how the government ' s botched response led to a fatal loss of trust in its leader. Compiled through exhaustive research and interviews with dozens of key figures and witnesses, Enda the Road is the ultimate account of a nine-day political hurricane whirlwind that brought down a Taoiseach.

A comprehensive, engaging and timely Bakhtinian examination of the ways in which the music and lyrics of Pacific reggae, aspects of performance, a record album cover and the social and political context construct social commentary, resistance and protest. Framed predominantly by the theory and philosophy of Russian literary theorist Mikhail Bakhtin, this innovative investigation of the discourse of Pacific reggae in New Zealand produces a multi-faceted analysis of the dialogic relationships that create meaning in this genre of popular music. It focuses on the award-winning EP What ' s Be Happen? by the band Herbs, which has been recognised for its ground-breaking music and social commentary in the early 1980s. Herbs ' songs address the racism and ideology of the apartheid regime in South Africa and the relationship between sport and politics, as well as universally relevant conflicts over race relations, the experiences of migrants, and the historic and ongoing loss of indigenous people ' s lands. The book demonstrates the striking compatibility between Bakhtin ' s theorisation of utterances as ethical acts and reggae music, along with the Rastafari philosophy that underpins it, which speaks of resistance to social injustice, of ethical values and the kind of society people seek to achieve. It will appeal to a cross-disciplinary audience of scholars in Bakhtin studies; discourse analysis; popular cultural studies; the literary analysis of popular music and lyrics, and those with an interest in the culture and politics of Aotearoa New Zealand and the Pacific region.

Society is increasingly affected by climate impacts, from prolonged water shortages to damaging coastal floods and wildfires. Scientists studying climate variations are eager to have their knowledge used in adaptive decision making. To achieve this, science and society must engage productively around complex management and policy challenges. For over 20 years, the science-society interface has been fertile ground for the Regional Integrated Sciences and Assessments (RISA) programs sponsored by the U.S. National Oceanic and Atmospheric Administration. *Climate in Context* describes what it takes to help scientists and stakeholders work together to “ co-produce ” climate science knowledge, policy, and action. This state-of-the art synthesis reflects on lessons learned by RISA programs, and provides a sober assessment of the challenges ahead. Through case studies from various US regions, this book provides lessons and guidance for organizations and individuals who want to work at the science-society interface on a range of climate challenges.

There is a tension in English law between the idea that the courts might provide a remedy by creating new property rights and the understanding that the judiciary's role is limited to the protection of existing proprietary interests with the power to redistribute property residing in the legislature alone. While there are numerous instances in which the courts intervene to readjust property rights, these are disguised in metaphor and fiction. However, this has meant that the law in this area has developed without open consideration of justifications for redistributing property. The result of this is that there is little coherence in the law of proprietary remedies as a whole and a good deal of it is indefensible. The book examines redistributive processes such as tracing, subrogation and proprietary estoppel and the use of the constructive trust in the context of contracts to assign property, vitiated transactions, the profits of wrongdoing and the breakdown of intimate relationships. It contrasts the English treatment of this area of law with developments in other common law jurisdictions where a more dynamic understanding of property has permitted more open acknowledgement of the judicial role in redistributing proprietary rights.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

Essential site planning and design strategies, up-to-date with the latest sustainable development techniques Discover how to incorporate sound environmental considerations into traditional site design processes. Written by a licensed landscape architect with more than 20 years of professional experience, this authoritative guide combines established approaches to site planning with sustainable practices and increased environmental sensitivity. Fully revised and updated, *Site Planning and Design Handbook, Second Edition* discusses the latest standards and protocols-including LEED. The book features expanded coverage of green site design topics such as water conservation, energy efficiency,

green building materials, site infrastructure, and brownfield restoration.

This comprehensive resource addresses the challenges associated with site planning and design and lays the groundwork for success. *Site Planning and Design Handbook, Second Edition* explains how to: Integrate sustainability into site design Gather site data and perform site analysis Meet community standards and expectations Plan for pedestrians, traffic, parking, and open space Use grading techniques to minimize erosion and maximize site stability Implement low-impact stormwater management and sewage disposal methods Manage brownfield redevelopment Apply landscape ecology principles to site design Preserve historic landscapes and effectively utilize vegetation
