English-related linguistic creativity and language commodification are a constant topic of interest and analysis for scholars. This volume is intended to initiate a dialogue between these two domains of inquiry that have been abundantly addressed but rarely documented together or in relation to one another. English as used in mainland China is presented as a case study where it remains rather unclear the extent to which the language is actually used in people ' s lives, outside the domain of education. The volume enriches existing empirical studies by exploring the

creative and innovative uses of English in people ' s lives and its commodification at different language-centred economic spaces within China while also providing an update of our understanding of the sociolinguistic situation of English in China, a country undergoing rapid socio-economic transformation. English in China is the first attempt to discuss the possible relationship, intersection, and tension between two seemingly inseparable research topics. The book is an important resource for students and scholars in the fields of Applied Linguistics, Bilingualism, Sociolinguistics, Translation, and Contemporary Chinese Studies. **Risk Assessment and Cost Benefit Analysis** Multilingual Matters  
This edited volume is dedicated to the theory and applications of Computational Intelligence techniques for Intelligent Image Processing, Data Analysis and Information Retrieval. It consists of 52 accepted research papers from the 1999 International Conference on Computational Intelligence for Modeling, Control and Automation - CIMCA'99. The goal of this conference was to provide a medium for the exchange of ideas between theoreticians and practitioners to address the important issues in computational intelligence for

Corpora and Rhetorically Informed Text Analysis explores applications of rhetorically informed approaches to corpus research. Bringing together contributions from scholars in a variety of fields, it takes up questions of how theories and traditions in rhetorical analysis can be integrated with corpus techniques in order to enrich our understanding of language use, variation, and history. The studies included in this volume shed light on areas as diverse as student academic writing, political discourse, and the digital humanities. These studies all make use of a dictionary-based tagger called DocuScope, which recognizes tens-of-millions of words and phrases and slots them into categories based on their rhetorical functions. While DocuScope provides a through-line that both links the studies' various analytical procedures and primes their rhetorical insights, the volume is about more than the explanatory power of a single tool. It demonstrates how rhetorically informed approaches can complement more established corpus methodologies, underscoring their combined potential.

SUPERB EXECUTION RELIES UPON RIGOROUS PROJECT DOCUMENTATION A project will only be built as well as it is documented. This publication focuses on the key documentation needs of the landscape architectural design and construction documentation process. That includes both "design documentation" and "construction documentation" as well as all that which occurs

in the transition from one phase to the other. Documentation requirements include those components necessary to explore and define design intent, logic, physical proposals, and ultimately, the specific components included within construction and bid documents. Discover how proper documentation facilitates every stage of the design process from pre-planning to construction, and leads to a highly resolved built outcome. Understand the principles behind these documentation practices. Implement best practices specific to each documentation phase and drawing, from title block and cover sheet design to soil plans and plant protection. Organize keynoting systems, cross-referencing and interdisciplinary coordination amongst multiple consultants and vendors. Study sample project documents from a leading landscape architecture firm to better understand the elements and benefits of complete and well-coordinated project documentation. These standards have been time-tested by over 150 designers at the industry leading landscape architecture firm Design Workshop, reflecting a range of project types, including parks, streetscapes, urban spaces and over-structure construction. This guide shares the methods behind the success, to facilitate exceptional built outcomes through principled documentation practices.

This excerpt from the “masterful, timely, data-driven study of the gun control debate examines the potential of stronger purchasing laws (Choice). As the debate on gun control continues, evidence-based research is needed to answer a crucial question: How do we reduce gun violence? One of the biggest gun policy reforms under consideration is the regulation of firearm sales and stopping the diversion of guns to criminals. This selection from the major anthology of studies *Reducing Gun Violence in America* presents compelling evidence that stronger purchasing laws and better enforcement of these laws result in lower gun violence. Additional material for this edition includes an introduction by Michael R. Bloomberg and Consensus Recommendations for Reforms to Federal Gun Policies from the Johns Hopkins University.

One of the most powerful traditions of the Jewish fascination with language is that of the Name. Indeed, the Jewish mystical tradition would seem a two millennia long meditation on the nature of name in relation to object, and how name mediates between subject and object. Even within the tide of the 20th century 's linguistic turn, the aspect most notable in the almost entirely secular - Jewish philosophers is that of the personal name, here given pivotal importance in the articulation of human relationships and dialogue. The Name of God in Jewish Thought examines the texts of Judaism pertaining to the Name of God, offering a philosophical analysis of these as a means of understanding the metaphysical role of the name generally, in terms of its relationship with identity. The book begins with the formation of rabbinic Judaism in Late Antiquity, travelling through the development of the motif into the Medieval

Kabbalah, where the Name reaches its grandest and most systematic statement – and the one which has most helped to form the ideas of Jewish philosophers in the 20th and 21st Century. This investigation will highlight certain metaphysical ideas which have developed within Judaism from the Biblical sources, and which present a direct challenge to the paradigms of western philosophy. Thus a grander subtext is a criticism of the Greek metaphysics of being which the west has inherited, and which Jewish philosophers often subject to challenges of varying subtlety; it is these philosophers who often place a peculiar emphasis on the personal name, and this emphasis depends on the historical influence of the Jewish metaphysical tradition of the Name of God. Providing a comprehensive description of historical aspects of Jewish Name-Theology, this book also offers new ways of thinking about subjectivity and ontology through its original approach to the nature of the name, combining philosophy with text-critical analysis. As such, it is an essential resource for students and scholars of Jewish Studies, Philosophy and Religion. Superfund cleanup timing has been a long-standing concern of the Congress & EPA. In the Superfund Amendments & Reauthorization Act of 1986, the Congress set time goals for EPA & federal agencies to evaluate individual nonfederal & federal sites for placement on the National Priorities List (NPL) & begin various cleanup actions. In 1992, EPA introduced several initiatives designed to expedite Superfund cleanups. This report examines trends in the time taken to evaluate & process hazardous waste sites for possible placement on the NPL & to clean up these sites following their listing. Tables & graphs.

This book establishes and applies a linguistic framework for the synchronic and diachronic analysis of multi-word discourse markers (MWDMs). The aim of this study is to examine in detail how MWDMs have developed out of their polysemous lexical counterparts. First, this study critically evaluates existing Grammaticalization and Pragmaticalization theories addressing both their strengths and drawbacks. In the following, a revised Pragmaticalization approach is developed. Considering three linguistic dimensions, this approach consists of six mechanisms: Discursivization & Scope Extension (semantic dimension), Syntactic Isolation & Acategorialization (syntactic dimension) and Consistency & Prosodic Accentuation (phonological dimension). Using data from the Oxford Etymological Dictionary and the TV Corpus, the study then applies these mechanisms to the MWDMs by the way, all the same and what is more.

Providing a detailed corpus-informed analysis of these units, this book demonstrates the advantages of the suggested framework and consequently offers an innovative contribution to the field of linguistics.

A comprehensive, engaging and timely Bakhtinian examination of the ways in which the music and lyrics of Pacific reggae, aspects of performance, a record album cover and the social and political context construct social commentary, resistance and protest. Framed predominantly by the theory and philosophy of Russian literary theorist Mikhail Bakhtin, this innovative investigation of the discourse of Pacific reggae in New Zealand produces a multi-faceted analysis of the dialogic relationships that create meaning in this genre of popular music. It focuses on the award-winning EP *What's Be Happen?* by the band Herbs, which has been recognised for its ground-breaking music and social commentary in the early 1980s. Herbs' songs address the racism and ideology of the apartheid regime in South Africa and the relationship between sport and politics, as well as universally relevant conflicts over race relations, the experiences of migrants, and the historic and ongoing loss of indigenous people's lands. The book demonstrates the striking compatibility between Bakhtin's theorisation of utterances as ethical acts and reggae music, along with the Rastafari philosophy that underpins it, which speaks of resistance to social injustice, of ethical values and the kind of society people seek to achieve. It will appeal to a cross-disciplinary audience of scholars in Bakhtin studies;

"To Inform and Define: An Analysis of Information Provided in Dictionaries Used by Learners of English in China and Denmark" presents a masterly synthesis of lexicographical theory in relation to bilingual and learner's dictionaries and advances a radical argument about how such dictionaries are used and how they should be improved for the convenience of students. By tracing the history of the terms 'semantic' and 'pragmatic' in linguistics and philosophy, Saihong Li shows the weakness of any conceptual distinction between them. She goes on to demonstrate how inappropriate these terms are for thinking about the ways in which words are defined and explained in dictionaries. The theoretical argument is supported by detailed and comparative empirical research: learners of English as a second language in both China and Denmark were interviewed about their experiences as users of standard learner's dictionaries. The results

are presented in tabular form and their interpretation is statistically informed. This is a path-breaking study. Saihong Li makes an important contribution to lexicographical theory, and advances a sophisticated methodology for the comparative study of English-language learning on an international scale and in the global marketplace of learner's dictionaries. Her work will be of great value for language teachers, lexicographers, and students of interpretation, translation and language pedagogies. "To Inform and Define" should also attract serious attention from editors and publishers of learner's dictionaries.

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Compliance with federal equal employment opportunity regulations, including civil rights laws and

affirmative action requirements, requires collection and analysis of data on disparities in employment outcomes, often referred to as adverse impact. While most human resources (HR) practitioners are familiar with basic adverse impact analysis, the courts and regulatory agencies are increasingly relying on more sophisticated methods to assess disparities.

Employment data are often complicated, and can include a broad array of employment actions (e.g., selection, pay, promotion, termination), as well as data that span multiple protected groups, settings, and points in time. In the era of "big data," the HR analyst often has access to larger and more complex data sets relevant to employment disparities. Consequently, an informed HR practitioner needs a richer understanding of the issues and methods for conducting disparity analyses. This book brings together the diverse literature on disparity analysis, spanning work from statistics, industrial/organizational psychology, human resource management, labor economics, and law, to provide a comprehensive and integrated summary of current best practices in the field. Throughout, the description of methods is grounded in the legal context and current trends in employment litigation and the practices of federal regulatory agencies. The book provides guidance on all phases of disparity analysis, including: How to structure diverse and complex employment data for disparity analysis How

to conduct both basic and advanced statistical analyses on employment outcomes related to employee selection, promotion, compensation, termination, and other employment outcomes How to interpret results in terms of both practical and statistical significance Common practical challenges and pitfalls in disparity analysis and strategies to deal with these issues
