Networking Arguments presents an original study on the use and misuse of global institutional rhetoric and the effects of these practices on women, particularly in developing countries. Using a feminist lens, Rebecca Dingo views the complex networks that rhetoric flows through, globally and nationally, and how it ' s often reconfigured to work both for and against women and to maintain existing power structures. To see how rhetorics travel, Dingo deconstructs the central terminology employed by global institutions—mainstreaming, fitness, and empowerment—and shows how their meanings shift depending on the contexts in which they ' re used. She studies programs by the World Bank, the United Nations, and the United States, among others, to view the original policies, then follows the trail of their diffusion and manipulation and the ultimate consequences for individuals. To analyze transnational rhetorical processes, Dingo builds a theoretical framework by employing concepts of transcoding, ideological traffic, and interarticulation to uncover the intricacies of power relationships at work within networks. She also views transnational capitalism, neoliberal economics, and neocolonial ideologies as primary determinants of policy and arguments over women ' s roles in the global economy. Networking Arguments offers a new method of feminist rhetorical analysis that allows for an increased understanding of

global gender policies and encourages strategies to counteract the negative effects they can create.

"Sharing the Land, Sharing a Future" looks to both the past and the future as it examines the foundational work of the Royal Commission on Aboriginal Peoples (RCAP) and the legacy of its 1996 report. It assesses the Commission ' s influence on subsequent milestones in Indigenous-Canada relations and considers our prospects for a constructive future. RCAP ' s five-year examination of the relationships of First Nations, Metis, and Inuit peoples to Canada and to non-Indigenous Canadians resulted in a new vision for Canada and provided 440 specific recommendations, many of which informed the subsequent work of the Truth and Reconciliation Commission of Canada (TRC). Considered too radical and difficult to implement, RCAP ' s recommendations were largely ignored, but the TRC reiterates that longstanding inequalities and imbalances in Canada ' s relationship with Indigenous peoples remain and quite literally calls us to action. With reflections on RCAP ' s legacy by its co-chairs, leaders of national Indigenous organizations and the Minister of Crown-Indigenous Relations, and leading academics and activists, this collection refocuses our attention on the groundbreaking work already performed by RCAP. Organized thematically, it explores avenues by which we may establish a new relationship, build healthy and powerful communities, engage citizens, and move to action.

Digest of the Decisions of Dakota, North Dakota, and South Dakota Bloomsbury Publishing

This leading introduction to public policy is designed to provide learners with concrete tools for not only understanding public policy in general, but for analyzing "specific" public policies. It focuses on "what" policies governments pursue, "why" governments pursue the policies they do, and what the "consequences" of these policies are. Very contemporary in perspective, it introduces eight analytical models currently used by political scientists to describe and explain political life and then, using these various analytical models singly and in combination explores specific public policies in a variety of key domestic policy areas. For individuals interested in a summary of current public policy in a variety of areas.

The fully revised second edition of this textbook offers a comprehensive introduction to theories of public policy and policymaking. The policy process is complex: it contains hundreds of people and organisations from various levels and types of government, from agencies, quasi- and non-governmental organisations, interest groups and the private and voluntary sectors. This book sets out the major concepts and theories that are vital for making sense of the complexity of public policy, and explores how to combine their insights when seeking to explain the policy process. While a wide range of topics are covered – from multi-level governance and punctuated equilibrium theory to 'Multiple Streams' analysis and feminist institutionalism – this engaging text draws out the common themes among the variety of studies considered and tackles three key questions: what is the story of each theory (or multiple theories); what does policy theory tell us about issues like 'evidence based policymaking'; and how 'universal' are policy theories designed in the Global North? This book is the perfect companion for

undergraduate and postgraduate students studying public policy, whether focussed on theory, analysis or the policy process, and it is essential reading for all those on MPP or MPM programmes. New to this Edition: - New sections on power, feminist institutionalism, the institutional analysis and development framework, the narrative policy framework, social construction and policy design - A consideration of policy studies in relation to the Global South in an updated concluding chapter - More coverage of policy formulation and tools, the psychology of policymaking and complexity theory - Engaging discussions of punctuated equilibrium, the advocacy coalition framework and multiple streams analysis

"Public Bioethics collects the most influential essays and articles of James F. Childress, a leading figure in the field of contemporary bioethics. These essays, including new, previously unpublished material, cohere around the idea of "public bioethics," which involves analyzing and assessing public policies in biomedicine, health care, and public health, often through public deliberative bodies. The volume is divided into four sections. The first concentrates on the principle of respect for autonomy and paternalistic policies and practices. The second explores the tension

among bioethics, public policy, and religious convictions. It pays particular attention to the role of religious convictions in the formation of public policies and to the basis and limits of exemptions of health care providers who conscientiously oppose providing certain legal and patient-sought services. The third section looks at practices and policies related to organ transplantation. Childress focuses particularly on determining death, obtaining first-person consent for deceased organ donation, and allocating donated organs effectively and fairly. The book's fourth and final section maps the broad terrain of public health ethics, proposes a triage framework for the use of resources in public health crises, addresses public health interventions that potentially infringe civil liberties, and sheds light on John Stuart Mill's misunderstood legacy for public health ethics."--Provided by publisher.

Several Supreme Court battles during the Warren-Burger era finally brought public sector employees under constitutional protection, setting forth a new legal framework for personnel management. The new framework requires administrators to manage personnel foremost in compliance with the established constitutional principles without necessarily sacrificing efficiency. This non-technical book provides, for the first time, a comprehensive review of case laws principles that are central to today's personnel management and decision-making: procedural due process, First Amendment freedoms, equal protection of the laws with respect to anti-discrimination, affirmative action, and compensation, and governmental and official liability.

In *Public Policy: Politics, Analysis, and Alternatives*, students come to understand how and why policy analysis is used to assess policy alternatives. To encourage critical and creative thinking on issues ranging from the federal deficit to health care reform to climate change, authors Michael Kraft and Scott Furlong introduce and fully integrate an evaluative approach to policy. The Sixth Edition of *Public Policy* offers a fully revised, concise review of institutions, policy actors, and major theoretical models as well as a discussion of the nature of policy analysis and its practice. Both the exposition and data have been updated to reflect major policy controversies and developments through the end of 2016, including new priorities of the Donald Trump administration.

Affirmative action remains one of the most divisive issues in America, remaining unsolved since the 1960s civil rights legislation. Though many works have attempted to solve the dilemma, none have tried to identify the underlying causes of the backlash against the policy. In order to understand affirmative action's future, one must understand its evolution, its opposition, and its application both in America and in other nations. In a multi-disciplinary approach, this book examines affirmative action from comparative, historical, policy, and sociological perspectives. Also included is a list of Supreme Court rulings on affirmative action.
