Remember, kart chassis' deflect under the
driver's weight and this deflection affects
toe, caster and camber settings. On road
racing tracks (as opposed to sprint tracks),
karts will handle and accelerate better with
toe set to absolute zero. For sprint tracks.
slight toe-out (rarely more than two
millimeters) helps turn-in to

TM RACING - Engines The philosophy that has
always distinguished TM is without doubt the
choice of materials, which must always be of the
highest quality, and the workmanship, even
defined by some as “obsessive”, not to mention
the high performance of the engines used on the
standard bikes, in many cases far superior to those
of the most prestigious competitors.
