From #1 New York Times bestselling author Karen Kingsbury comes a “heart tugging and emotional” story in the Baxter Family collection that will “touch readers deeply” (RT Book Reviews) featuring two people who lost their parents in the same national tragedy—two people desperate to find each other and the connection they shared for a single day...that changed everything. Brady Bradshaw was a child when the Oklahoma City bombing killed his mother. Every year, Brady visits the memorial site on the anniversary to remember her. Eleven years

ago on that day, he met Jenna Phillips, who was also a child when her parents were killed in the attack. Brady and Jenna shared a deep heart connection and a single beautiful day together at the memorial. But after that, Brady never saw Jenna again. Every year when he returns, he leaves a note for her in hopes that he might find her again. This year, Ashley Baxter Blake and her sister Kari Baxter Taylor and their families take a spring break trip that includes a visit to the site to see the memorial’s famous Survivor Tree. While there, Ashley spots a young man, alone and troubled. That man is Brady Bradshaw. A chance moment leads Ashley to help Brady find Jenna, the girl he can’t forget. Ashley’s family is skeptical, but she pushes them to support her efforts to find the girl and bring them together. But will it work? Will her husband, Landon, understand her intentions? And is a shared heartache enough reason to fall in love? With To The Moon and Back “Kingsbury skillfully weaves a tale of divine love” (Publishers Weekly, starred review) in an unlikely love story about healing, redemption, hope, and the

belief that sometimes a new tomorrow can grow from the ashes of a shattered yesterday. "Kingsbury writes with seemingly effortless poetic elegance, capturing the tender, intimate moments of daily family life as well as heart-wrenching flashbacks to fatal tragedy. A moving story of survival, of faith, and of beauty from the ashes" (Booklist).

I have traveled over two million five hundred thousand miles on airplanes, which is equivalent to one hundred times around the world or to the moon and back five times. During these travels, I have experienced disasters, fear, and some very funny stories. My stories begin with my travels as a young boy leaving the US for foreign soil and end with the top ten reasons you know you fly too much. Included are stories about a plane crash that in 1969 was the worst commercial aviation accident in the world, my one close call on an airplane, hijackings to Cuba, an earthquake in 1976 that killed 28,000 people and several funny stories I have experienced during my travels.

The best seats Lisa Kohn ever had at Madison Square Garden were at her mother's mass wedding, and the best cocaine she ever had was from her father's friend, the judge. Born to hippie parents and raised in New York City's East Village in the 1970s, Lisa's early years were a mixture of encounter groups, primal screams, macrobiotic diets, communes, Indian ashrams, Jefferson Airplane concerts in Central Park, and watching naked actors on off-Broadway stages during the musical HAIR. By the time her older brother was ten, Lisa's father had him smoking pot. By the time Lisa was ten, Lisa's mother had them pledging their lives to the Unification Church (the "Moonies") and self-appointed Messiah, Reverend Sun Myung Moon. As a child Lisa knew the ecstatic comfort of inclusion in a cult and as a teenager the torment of rebelling against it. As an adult, Lisa struggled to break free from the hold of abuse and the scars in her heart, mind, and psyche--battling

her own addictions and inner demons and searching her soul for a sense of self-worth. Told in spirited candor, to the moon and back reveals how one can leave behind absurdity and horror and create a life of intention and joy. This is the fascinating tale of a story rarely told in its full complexity.

Former NASA Astronaut Harrison Schmitt advocates a private, investor-based approach to returning humans to the Moon—to extract Helium 3 for energy production, to use the Moon as a platform for science and manufacturing, and to establish permanent human colonies there in a kind of stepping stone community on the way to deeper space. With governments playing a supporting role—just as they have in the development of modern commercial aeronautics and agricultural production—Schmitt believes that a fundamentally private enterprise is the only type of organization capable of sustaining such an effort and, eventually, even making it pay off.
