Toa Electronics ZM-104A Overview The ZM-104 from TOA Electronics is a portable impedance meter that can measure the impedance of speaker lines up to 100 k ohms. It has an adjustable zero for accuracy on all ranges. It runs on four "AA" batteries and has an easy-to-read meter that calibrates directly in ohms.

This is the method that the ZM-104 uses. The meter has a high output impedance and acts like a constant current source

(the current through the load is independent of the load impedance). The small voltage drop across the load is proportional to the load impedance. This voltage produces the meter deflection on the calibrated scale. The ZM-104
