marine life Sheds light on newly discovered species and draws on the latest science An essential resource for anyone interested in Madagascar or tropical ecosystems in general, from biologists and conservationists to ecotourists and armchair naturalists Super Mario 3D World - Strategy Guide Teacher Created Materials What does an unusually large, ugly, invasive species of toad have to do with global warming, international trade, and the survival of biodiversity? Quite a lot, actually. Mark Lewis's amazing and hilarious documentary Cane Toads tells the story of Bufo marinus, which was introduced to Australia in 1935 to control bugs but which quickly became a far greater menace than the beetles they eat. Today they number in the hundreds of millions and are taking over Australian habitats at 25 miles per year, spreading disease and killing native species as they go. Rogue Species explains the little-understood dangers of invasive species. Ranging from the zebra mussel (currently threatening the health of the Great Lakes) to the infamous kudzu vine (a Japanese import that now smothers seven million acres in the American southeast), these disastrous human blunders threaten the biodiversity on which all life—including our own—depends. The book will raise readers' awareness about the threat of non-native species, increase their appreciation of natural biodiversity, and explain what they can do to help protect unique ecosystems wherever they live or travel.

The story of visionary American running coach Bob Larsen's mismatched team of elite California runners who would win

championships and Olympic glory in a decades-long pursuit of "the epic run." In the dusty hills above San Diego, Bob Larsen became America's greatest running coach. *Running to the Edge* is a riveting account of Larsen's journey, and his quest to discover the unorthodox training secrets that would lead American runners to breakthroughs never imagined. Futterman interweaves the dramatic stories of Larsen's runners with a fascinating discourse on the science behind human running, as well as a personal running narrative that follows Futterman's own checkered love-affair with the sport. The result is a narrative that will speak to every runner, a story of Larsen's triumphs--from high school cross-country meets to the founding of the cult-favorite, 70's running group, the Jamul Toads; from his long tenure as head coach at UCLA to the secret training regimen of world champion athletes like Larsen's protégé, Meb Keflezighi. *Running to the Edge* is a page-turner . . . a relentless crusade to run faster, farther.
