Anyone who has lived near New Haven, Connecticut, in the past 40-plus years has surely heard of Toad ' s Place. With a capacity of 750, Toad ' s has served as the perfect spot for musicians who prefer smaller venues. U2 played one of their first US concerts there, on their Boy tour. In 1978, Bruce Springsteen was in New Haven and arrived at Toad ' s unannounced, and got up and played. The surprises kept coming and the club was

attracting big names, as well as up-and-comers. In 1989, the Rolling Stones played a surprise show on a Saturday night, giving 700 fans the night of their dreams. Nothing could have been better—the Rolling Stones in downtown New Haven was unimaginable! That is only a taste of the stories that are uncovered in this book. Randall Beach and Toad ' s owner Brian Phelps recall the legendary shows and behind-the-scenes stories.

The story of visionary American running coach Bob Larsen's mismatched team of elite California runners who would win championships and Olympic glory in a decades-

long pursuit of "the epic run." In the dusty hills above San Diego, Bob Larsen became America's greatest running coach. Running to the Edge is a riveting account of Larsen's journey, and his quest to discover the unorthodox training secrets that would lead American runners to breakthroughs never imagined. Futterman interweaves the dramatic stories of Larsen's runners with a fascinating discourse on the science behind human running, as well as a personal running narrative that follows Futterman's own checkered love-affair with the sport. The result is a narrative that will speak to every runner,

a story of Larsen's triumphs--from high school cross-country meets to the founding of the cult-favorite, 70's running group, the Jamul Toads; from his long tenure as head coach at UCLA to the secret training regimen of world champion athletes like Larsen's protégé, Meb Keflezighi. Running to the Edge is a page-turner . . . a relentless crusade to run faster, farther.

What does an unusually large, ugly, invasive species of toad have to do with global warming, international trade, and the survival of biodiversity? Quite a lot, actually. Mark Lewis's amazing and hilarious documentary *Cane Toads* tells the story of *Bufo marinus*, which was introduced to Australia in 1935 to control bugs but which quickly became a far greater menace than the beetles they eat. Today they number in the hundreds of millions and are

taking over Australian habitats at 25 miles per year, spreading disease and killing native species as they go. *Rogue Species* explains the little-understood dangers of invasive species. Ranging from the zebra mussel (currently threatening the health of the Great Lakes) to the infamous kudzu vine (a Japanese import that now smothers seven million acres in the American southeast), these disastrous human blunders threaten the biodiversity on which all life—including our own—depends. The book will raise readers' awareness about the threat of non-native species, increase their

appreciation of natural biodiversity, and explain what they can do to help protect unique ecosystems wherever they live or travel.

Running to the Edge

"O'Reilly Media, Inc."

New York Times Bestseller

"An exquisite, hilarious and devastating dissection."

—Malcolm Gladwell Why do the English keep apologizing? Why are they so unenthusiastic about enthusiasm? Why does rain

surprise them? When are they being ironic, and how can you tell? Even after eighteen years in London, New York Times reporter Sarah Lyall remained perplexed and intrigued by its curious inhabitants and their curious customs. She's since returned to the United States, but this distillation of incisive—and irreverent—insights, now updated with a new preface, is just as illuminating today. And perhaps even more so, in the wake of Brexit and the attendant national identity crisis. While there may be no

easy answer to the question of how, exactly, to understand the English, *The Anglo Files*—part anthropological field study, part memoir—helps point the way.
