Technology, and particularly the Internet, has caused many changes in the realm of politics. Mainstream media no longer has a monopoly on political commentary as social media, blogs, and user-generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The Handbook of Research on Political Activism in the Information Age includes progressive research from more than 39 international experts at universities and research institutions across 15 different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students and professionals working in the fields of politics, e-government, media and communications, and Internet marketing.

Discover Nigeria, Africa's most populous country, in this thematic encyclopedia that covers everything from geography and economics to etiquette and pop culture. Part of Bloomsbury's Understanding Modern Nations series, this volume takes readers on a tour of contemporary Nigeria, helping them better understand the country and the many cultures, religions, and ethnicities that call it home. Chapters are organized thematically, examining a variety of topics, including geography, history, government, economics, religion, ethnic and social groups, gender, education, language, etiquette, food, literature and the arts, and pop culture. Each chapter begins with an overview essay, followed by a selection of encyclopedic entries that provide a more nuanced look at that facet of modern Nigeria. The main text is supplemented with sidebars that highlight additional high-interest topics. A collection of appendices rounds out the volume, offering short vignettes of daily life in the country, a glossary of key terms, statistical

data, and a list of state holidays. Once a pawn of British colonialism, today Nigeria is a sovereign nation and key player on the world stage. Its vast oil resources have made it an international powerhouse and the wealthiest country on the African continent, yet political unrest and corruption, and ethnic and religious violence continue to threaten this prosperity. Nigeria is equally rich culturally, a nation where time-honored traditions mix with contemporary influences. Explore the diversity of modern Nigeria in this concise and accessible volume.

The study was led by six research questions, and six hypotheses were examined at a significance level of 0.05. The quasi-experimental design was used, notably the non-equivalent control group design for the pretest and posttest. 4,873 senior secondary school students in the Nnewi Education Zone of the state of Anambra make up the study's population. In the study, 2.73 percent of the population was used. A sample of 133 Nnewi Education Zone SS2 computer science students was used. The Computer Studies Department and one knowledgeable computer studies teacher from Nnewi. Kuder-Richardson Formula 20 was used to determine the instrument's reliability. The CSAT was used as a pretest and posttest to gather data. Three weeks following the post test, the retention test was given. The results demonstrated that a lesson followed by animated media education greatly improved students' computer science performance. When compared to the traditional approach, only tutorials considerably increased students' retention, however, this improvement was not significant when compared to animated media. The study concluded that tutorials are successful at raising students' achievement and retention. The use of animated material in the classroom has been shown to improve student achievement.
