This thesis deals with design and development of a manual breast pump with an ergonomic approach. This project is the further study of the previous project which is the preliminary design of the manual breast pump. The purpose of this study is to prevent the musculoskeletal disorder problems among mothers who expressed the breast milk using manual breast pump. The objectives of this study is to design a manual breast pump with ergonomics approach using Solidworks, to make a prototype of the designed manual breast pump using Rapid Prototyping machine and to validate the designed manual breast pump using simulation process and manual calculation. The scope of this project is that the developed manual breast pump is only a prototype and is not readily functional as a commercial product. While the validations of the manual breast pump through the simulation software is considered precise. The strategy of validation of finite element analysis was developed for this project. The finite element analysis was then performed using ALGOR and the bottle part of the design was analyzed using the static stress with linear material model. The other part of the design which is the pressure pump was also manually calculated. The obtained results indicate that the maximum value of the result shows in the bottom of the bottle due to the surface boundary condition. The manual calculation of the pressure pump shows that the design just can produce the maximum pressure of about 4,000 Pa. While a good manual breast pump should produce at least about 2,000 Pa. However the area is not suitable to be reducing in a great number due to the ergonomics condition.

Meanwhile, the objectives for this study is to design a manual breast pump with an ergonomics approach using the Solidwork and to analyze the designed manual breast pump using the manual calculation. The methodology for this project used the survey instrument which is questionnaires and the software for the design stage. Result is the chapter where the analysis of the questionnaires that were distributed to the respondents. It is also included the analysis of the main part using the manual calculation. Lastly, it recovers the conclusion for the project. The study hopefully can help the future researcher in order to create and develop the new design for the manual breast pump.

“TRACY HOGG HAS GIVEN PARENTS A GREAT GIFT—the ability to develop early insight into their child’s temperament.” –Los Angeles Family When Tracy Hogg’s *Secrets of the Baby Whisperer* was first published, it soared onto bestseller lists across the country. Parents everywhere became “whisperers” to their newborns, amazed that they could actually communicate with their baby within weeks of their child’s birth. Tracy gave parents what for some amounted to a miracle: the ability to understand their baby’s every coo and cry so that they could tell immediately if the baby was hungry, tired, in real distress, or just in need of a little TLC. Tracy also dispelled the insidious myth that parents must go sleepless for the first year of a baby’s life—because a happy baby sleeps through the night. Now you too can benefit from Tracy’s more than twenty years’ experience. In this groundbreaking book, she shares simple, accessible programs in which you will learn:

- E.A.S.Y.—how to get baby to eat, play, and sleep on a schedule that will make every member of the household’s life easier and happier.
- S.L.O.W.—how to interpret what your baby is trying to tell you (so you don’t try to feed him when he really wants a nap).
- How to identify which type of baby yours is—Angel, Textbook, Touchy, Spirited, or Grumpy—and then learn the best way to interact with that type.
- Tracy’s Three Day Magic—how to change any and all

bad habits (yours and the baby’s) in just three days. At the heart of Tracy’s simple but profound message: treat the baby as you would like to be treated yourself. Reassuring, down-to-earth, and often flying in the face of conventional wisdom, *Secrets of the Baby Whisperer* promises parents not only a healthier, happier baby but a more relaxed and happy household as well.

"Lyndsey Hookway's *Holistic Sleep Coaching* is the book parent-child health professionals have been waiting for regarding infants', children's, and parents' sleep! The comprehensive content is comprised of an exhaustive review of the sleep literature, but it is written in a reader-friendly discussion format. (References are cited in text with the complete reference list in APA alphabetical style at the end.) I appreciate Hookway's evidence-based approach with its emphasis on human sleep biology. Yet her words constantly model sensitivity and empathy for both babies/children and their parents who live in our current cultural landscape of isolated nuclear families dependent on two incomes and often miles from physical support." -Karen Kerkhoff Gromada, MSN, RN, IBCLC, FILCA Author: *Mothering Multiples: Breastfeeding and Caring for Twins or More* "There is much to like in Hookway's book, including her clear understanding of the link between breastfeeding and sleeping, and the importance of sleep for parental mental health. Educating practitioners about normal infant sleep is an important task. Too many are only

---

aware of extinction methods for addressing parental sleep concerns: with Holistic Sleep Coaching Hookway is laying the groundwork for the development of a more evidence-based and systematic approach." -Helen Ball, Professor of Anthropology, Director of the Durham Infancy & Sleep Centre (DISC), Founder of the Baby Sleep Info Source (Basis) "As a breastfeeding professional, I was curious and hopeful when I began reading Lyndsey Hookway's book, Holistic Sleep Coaching. One of the biggest worries for most new parents is how lack of sleep will impact their family, particularly within the context of breastfeeding. This book is not about training a baby how to sleep, or using dangerous methods that can comprise the breastfeeding relationship. This book IS about understanding how sleep works and how to use that knowledge to understand one's baby. It enables parents to support the uniqueness of their child, continue breastfeeding effectively, and identify how to create the most supportive environment possible to optimize sleep within their distinct family. I would definitely recommend this book as a MUST for new parents before their baby arrives, as well as an integral resource for all perinatal professionals!

-Laurel Wilson, IBCLC, RLC, CLE, CLD, CCCECo-Author of The Attachment Pregnancy and The Greatest Pregnancy Ever Infants are probably sleeping no differently now than they were 1000 years ago. However, parenting has changed. We are dealing with the paradox of parenting information overload, coupled with time-poverty. Parents know more than ever about the importance of love, attachment and security to young children. They may know about good nutrition, stress management, toxins, skin to skin, breastfeeding, one-to-one time, emotion coaching and organic food. Parents are bombarded with appliances that are

supposed to make their lives easier, and yet end up confused about what is really necessary. At the same time, modern parents are leading busy, expensive lives, and have jobs that they love or need. And within all this, their babies are still sleeping the same as they always have. Some sleep experts are quick to suggest quick fixes to lengthen infant sleep, but there is growing concern that techniques such as extinction may have negative outcomes for infants as well as being stressful for parents. Holistic Sleep Coaching is a multi-dimensional approach that looks at the big picture and recognises that babies' needs are not just physical but psychological, emotional and relational. Holistic Sleep Coaching provides an evidence-based overview of how to optimise sleep without leaving babies and children to cry for health and child care professionals.

*Breastfeeding in Combat Boots* is a much needed resource for active-duty mothers and mothers-to-be, who are seeking information and support on how to breastfeed successfully while

serving their country. Are you pregnant and in the military? Do you want to breastfeed, but just don't know how you can combine 12 hour shifts, training exercises, or deployment with breastfeeding your baby? Robyn Roche-Paull answers these questions and more in *Breastfeeding in Combat Boots - A Survival Guide to Successful Breastfeeding While Serving in the Military*. As a veteran of the United States Navy, mother of three breastfed children, International Board Certified Lactation Consultant, and La Leche League Leader, the author has helped many active-duty mothers breastfeed their babies. She has now compiled this knowledge into a comprehensive guide to help all mothers in the military breastfeed their babies successfully. Most services now have written policies in place to support breastfeeding and direct commanders to provide a place and time for pumping milk. However, even with the policies in place, military mothers face unique circumstances that can make breastfeeding successfully a challenge. This book was written to help military mothers overcome the challenges they face so they can provide the best nutrition for their babies. Some of the topics covered include: How do I get breastfeeding off to a good start in only six short weeks? Can I pump while in the desert for training exercises? Is my pump allowed onboard ship? Do I need to pump and dump if I've been exposed to JP-8? How do I deal with co-workers who do not support my pumping while on duty? These questions and more are answered in *Breastfeeding in Combat Boots!* In this book, the author provides military moms with insight into the rewarding and wonderful aspects of breastfeeding on active duty, while also giving a realistic look at the challenges that lay ahead. ## **General Nursing, Freezing Breastmilk, Breast Pumps, Electric, Battery and Manual First Experiences**

Unashamedly oversharing the truth about the first year  
Confessions of a Crummy Mum - The Baby Years by parenting blogger and accidental mum of four Natalie Brown (@confessionsofacrummymummy) is the literary equivalent of the tea and toast you're handed after giving birth: warm, reassuring and you can't help but want more! An antidote to the traditional parenting manual, the telling-it-how-it-is parenting memoir lifts the lid on a subject the hugely successful genre of telling-it-how-it-is parenting memoirs has yet to touch on: giving birth during a global pandemic. And let's just say giving birth during a global pandemic was not in the birth plan! An easy-to-digest and quick-paced list-style format offers a collection of witty and brutally honest confessions time-poor mums can dip in and out of and back into again. Starting with the birth and what really happens to your lady bits after pushing a human being out of your foo-foo, chapters are split into confessions on subjects including breastfeeding, weaning, homeschooling and washing - and what happens when you find yourself doing it all in the middle of a global pandemic. The light-hearted and entertaining confessions are peppered with heartfelt thoughts, frustrations, and home truths about the first year that every mum will relate to, making the book a perfect gift and must-read for all new (and not so new) mamas feeling like they're doing too many things and none of them well.
