Extreme race, city festival, global phenomenon - the New York Marathon is much more than a never-ending run. On top of the 50,000 plus participants who actually run the race, it ' s an event that involves millions of people when you include the thousands of volunteers, the hundreds of thousands of supporters lining the streets of the metropolis par excellence, and the global TV audience watching at home. "The Never-Ending Run" aims to give a 360 ° explanation and tell the story of one of the most famous marathons in the world, starting with a mile-by-mile

description of the race, including first-hand experiences. On the back of the story of the race, there follows a guide to New York specially dedicated to runners and all their shopping and tourism needs, along with scores of interesting facts and stats. "The Never-Ending Run" recounts the history of the New York City Marathon, provides intriguing insights and explains how to participate and properly prepare for the race- all without overlooking essential tips and suggestions for enjoying life, and your break, in the Big Apple. Part one, The Race, illustrates the history and route of the most

famous race in the world, including race strategies by coach Fulvio Massini, as well as accounts from other famous athletes, such as Peter Ciaccia, Orlando Pizzolato, Franca Fiacconi, George Hirsch, German Silva, and Alex Zanardi. Part two, New York, is given over to the needs of the runner in town for the race: how to get around; where to go shopping for running gear; advice on what to do - and not do - in the days leading up to the race; and the best places to watch the race for spectators. 'This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States.' Ali Nikpay, Gibson, Dunn & Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law, focused on case law analysis. Each chapter begins with an introduction which outlines the relevant laws, regulations and guidelines for each of the topics, setting the analytical foundations for the case entries. Within this framework, cases are reviewed in

summary form, accompanied by useful analysis and commentary. The 7th edition includes recent judgments from the European Court of Justice on the scope of object and effects based analysis (including Generics and Budapest Bank), as well as those on abuse of dominance. It examines developments in parallel trade, online sales restrictions, advertising bans, enforcement powers and procedure. Expanding its coverage of merger decisions, it explores non-collusive oligopoly (including CK Telecoms) and the treatment of innovation and data under the EU Merger Regulation. This unique book offers the practitioner and competition law student an insightful guide to EU competition law cases, an understanding of which is crucial. Rigorous, comprehensive and authoritative, it simply is a must read.

What risks are
associated with
automation and how
will society
respond to these
risks? How will the
marketplace react
to automated
vehicles and what
changes may be

necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will

form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of

these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

"[A] violent, surrealist romp" from the Tony Award-winning playwright of Hurlyburly and

Visiting Edna (The Brown Daily Herald). David Rabe explores the struggle between hope and anguish in the human spirit in this story of two small-time jewel thieves united in a strangely unsettling friendship and the constant fight to prove to themselves and others how tough they are. But when their frantic scheming suddenly begins to betray them in mysterious ways, they find themselves trapped into a kidnapping and a murder over which they seem to have no control. Or do they? David Rabe's language creates and recreates reality in constantly surprising ways, magically dramatizing the danger of the power of illusion—and the illusion of

power—with force and insight. “A potluck smorgasbord of surrealism, dream soliloquies, science fiction, noir potboiler and fairy tales, with the ghosts of such other writers as David Mamet, Harold Pinter, Sam Shepard and even novelist Thomas Pynchon hovering nearby . . . boasts ample proof of a top-notch writer at work.” —Chicago Tribune “A fast-paced, visceral work with a manic, anarchic energy . . . a chaotic examination of power and powerlessness in a frightening, irrational universe.” —The Brown Daily Herald “[A] surrealist, hilarious, mind-fuck of a play . . . a wild, high-energy ride through plot and action.” —LAist Praise for

David Rabe “Few contemporary dramatists have dealt with violence, physical and psychological, more impressively than Rabe.” —Kirkus Reviews “A remarkable storyteller.” —Chicago Tribune “Rabe’s mastery of dialogue is the equal of Pinter and Mamet put together.” —The Boston Globe.

Books
This open access book offers a summary of the development of Digital Earth over the past twenty years. By reviewing the initial vision of Digital Earth, the evolution of that vision, the relevant key technologies, and the role of Digital Earth in helping people respond to global challenges, this publication reveals how and why Digital Earth is becoming vital for acquiring,

processing, analysing and mining the rapidly growing volume of global data sets about the Earth. The main aspects of Digital Earth covered here include: Digital Earth platforms, remote sensing and navigation satellites, processing and visualizing geospatial information, geospatial information infrastructures, big data and cloud computing, transformation and zooming, artificial intelligence, Internet of Things, and social media. Moreover, the book covers in detail the multi-layered/multi-faceted roles of Digital Earth in response to sustainable development goals, climate changes, and mitigating disasters, the applications of

Digital Earth (such as digital city and digital heritage), the citizen science in support of Digital Earth, the economic value of Digital Earth, and so on. This book also reviews the regional and national development of Digital Earth around the world, and discusses the role and effect of education and ethics. Lastly, it concludes with a summary of the challenges and forecasts the future trends of Digital Earth. By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth, this book offers an essential introduction for an ever-growing international audience.
