'This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States.' Ali Nikpay, Gibson, Dunn & Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law, focused on case law analysis. Each chapter begins with an introduction which outlines the relevant laws, regulations and guidelines for each of the topics, setting the analytical foundations for the case entries. Within this framework, cases are reviewed in summary form, accompanied by useful analysis and commentary. The 7th edition includes recent judgments from the European Court of Justice on the scope of object and effects based analysis (including Generics and Budapest Bank), as well as those on abuse of dominance. It examines developments in parallel trade, online sales restrictions, advertising bans, enforcement powers and procedure. Expanding its coverage of merger decisions, it explores non-collusive oligopoly (including CK Telecoms) and the treatment of innovation and data under the EU Merger Regulation. This unique book offers the practitioner and competition law student an insightful guide to EU competition law cases, an understanding of which is crucial. Rigorous, comprehensive and authoritative, it simply is a must read.

Knowledge Management and Knowledge Engineering is a fascinating ?eld of re- 1 search these days. In the beginning of EKAW, the modeling and acquisition of knowledge was the privilege of – or rather a burden for – a few knowledge engineers familiar with knowledge engineering paradigms and knowledge rep- sentation formalisms While the aim has always been to model knowledge ded- atively and allow for reusability, the knowledge models produced in these early days were typically used in single and very speci?c applications and rarely - changed. Moreover, these models were typically rather complex, and they could be understood only by a few expert knowledge engineers. This situation has changed radically in the last few years as clearly indicated by the following trends: – The creation of (even formal) knowledge is now becoming more and more collaborative. Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds (or at least of "the many") to lead to broader consensus and thus produce shared models which qualify better for reuse. – A trend can also be observed towards developing and publishing small but 2 3 4 high-impact vocabularies (e.g, FOAF, DublinCore, GoodRelations) rather than complex and large knowledge models.

A Beginner's Guide to Devising Theatre Bloomsbury Publishing

Much of the theatre we make starts with a script and a story given to us by someone else. But what happens when we're required to start from scratch? How do we begin to make theatre using our own ideas, our own perspective, our own stories? A Beginner's Guide to Devising Theatre, written by the artistic directors of the award-winning young people's performance company Junction 25 and is aimed at those new to devising or wanting to further develop their skills. It explores creative ways to create original theatre from a contemporary stimulus. It offers a structure within which to approach the creative process, including ideas on finding a starting point, generating material, composition and design; it offers practical ideas for use in rehearsal; and it presents grounding in terminology that will support a confident and informed approach to production. The book features contributions from some of the young performers who have been a part of Junction 25's work to date, as well as key artists and companies that work professionally in devised theatre, including case studies from Quarantine, the Team, Mammalian Diving Reflex, Nic Green and Ontroerend Goed. The work of Junction 25 is used to illustrate the concepts and ideas set out in the book. Ideal for any student faced with the challenge of creating work from scratch, A Beginner's Guide to Devising Theatre offers constructive guidance, which supports the requirements of students taking Drama and Theatre Studies courses. The book includes a foreword by theatre critic Lyn Gardner.
