have to be strongly taken into consideration by, for instance, developing driver interfaces as well as reliable and robust automated driving controllers. The main topics of the book are ranging from the question of how these TrustVehicles should behave and interact with users, the development of reliable sense-plan-act approaches, the whole verification procedures starting with simulation to studies on the driving simulator and the verification on a test track. All these steps together provide an overall picture and pave the way to trustworthy and reliable automated vehicles – so-called TrustVehicles.

In the new world of work, agility is a business imperative. Agile HR is a practical guide written specifically for people professionals on how the HR function can develop agile processes and practices that save time, boost

---

performance and support overall business goals. From small tech start-ups or large traditional companies, organizations need to be fast, flexible and digitally empowered to succeed. However, too many companies are stuck with siloed, compliance-driven HR processes that work in opposition to the business rather than supporting it. This results in the view that HR is slow and out of touch. However, Agile HR shows that this doesn't need to be the case. Covering every aspect of the HR function from people processes, ways of working and HR services to organization design, operating models and HR teams, Agile HR is an essential guide for all HR practitioners wanting to make their HR practices agile and drive business performance but don't know where to start. As well as guidance on how to deal with resistance, manage a backlog and deal with constraints, there is also invaluable

guidance on how HR can prioritize effectively and assess which activities to pursue, which to develop, which to rework and which to abandon in order to achieve continuous business improvement. Supported by case studies from organizations who have seen the benefits of an agile approach to HR including Sky Betting & Gaming and MUJI, this is critical reading for all HR professionals in organizations of any size needing to adopt fast, flexible and evolving agile approaches to effectively compete in the new world of work. America's future depends on a vibrant highway system capable of supporting industry and the travel needs of its citizens. The country's highway system can trace its roots to the movements of major armies in colonial times, such as British General Braddock using George Washington's assistance in a disastrous attack of French forces defending Ft. Duquesne. These early roads developed into the engineering marvels of today's modern highway system. But this system is in serious trouble. Inadequate funding and poor management are

---

responsible for its gradual deterioration, and along with it, the U.S. economy. A broad range of solutions can solve this problem, some of which involve transforming public transportation agencies into privately operated utilities. Many of these exciting solutions also offer the potential to solve America's funding problems. This book is must-reading for anyone concerned with America's future, as it shows us

build momentum to take people with you; test the validity of ideas with a 5 minute business plan; recognize the customer isn't always right – but listen to them anyway...and more. Backpacker Kluwer Law International B.V. All are agreed that the digital economy contributes to a dynamic evolution of markets and competition. Nonetheless, concerns are increasingly raised about the market dominance of a few key players. Because these companies hold the power to drive rivals out of business, regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs. This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines, social networks, and e-commerce platforms – commonly referred to as the 'gatekeepers' of the Internet. The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a 'refusal to deal' and lead to competition law liability under the so-called 'essential facilities doctrine', according to which firms need access to shared knowledge in order to be able to compete. A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals. Building on the refusal to deal concept, and using a multidisciplinary approach, the analysis covers such issues and topics as the following:

- data portability;
- interoperability;
- data as a competitive advantage or entry barrier in digital markets;
- market definition and dominance with respect to data;
- disruptive versus sustaining innovation;
- the role of intellectual property regimes;
- economic trade-off in essential facilities cases;
- relationship of competition enforcement with data protection law and – data-related competition concerns in merger cases. The author draws on a wealth of relevant material, including EU and US decision-making practice, case law, and policy documents, as well as economic and empirical literature on the link between competition and innovation. The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data. In addition, it makes suggestions as to how data protection interests can be integrated into competition policy. An invaluable contribution to ongoing academic and policy discussions

---

about how data-related competition concerns should be addressed under competition law, the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms. It will be of immeasurable value to the many jurists, business persons, and academics concerned with this very timely subject.
