Tonal Harmony with an Introduction to 20th-Century Music is intended for a two-year course in music theory/harmony. It offers a clear and thorough introduction to the resources and practice of Western music from the 17th century to the present day. Its concise, one-volume format and flexible approach make the book usable in a broad range of theory curricula. The text provides students with a comprehensive but accessible and highly practical set of tools for the understanding of music. Actual musical practice is emphasized more than rules or prohibitions. Principles are explained and illustrated, and exceptions are noted. In its presentation of harmonic procedures, the text introduces students to the most common vocal and instrumental textures encountered in tonal music. Traditional four-part chorale settings are used to introduce many concepts, but three-part instrumental and vocal textures are also presented in illustrations and drill work, along with a variety of keyboard styles. To encourage the correlation of writing and performing skills, we have included musical examples in score and reduced-score formats as well as charts on instrumental ranges and transpositions. Some of the assignments ask the student to write for small ensembles suitable for performance in class. Instructors may modify these assignments to make them most appropriate for their particular situations. - Preface.

The volumes in the Mapping Tonal Harmony collection have been envisioned as auxiliary material in the study of Tonal Harmony. The main objective of these books is to provide the student, teachers, composers and/or songwriters with a tool that will aid them in hearing, analyzing, foreseeing, and composing harmonic progressions without struggle, in all keys alike. These workbooks are based on the map used in the Mapping Tonal Harmony Pro app by mDecks Music, which is recommended as accompanying material/tool for all volumes. All maps, progression examples and exercises in these books, were designed to improve and expand the student's view of the harmonic surroundings around each and every tonal center. The volumes in this collection are organized in a progressive manner, each volume expanding the previous volume's map by introducing new harmonic concepts and/or functions, based on the premise that all functions introduced in earlier volumes have been understood and assimilated. Each new concept or function adds some level of detail to the map and/or extends the known area around the tonic. Many of the concepts presented in these books are simply mentioned for mapping purposes only, and should be carefully studied by using other sources such as: a harmony course, tonalharmony books, teachers, etc. Voice-leading and inversions are not covered in these volumes since their main objective is to map essential harmonic functions in every key. Vol. 1 The basic major & minor diatonic neighborhoods Tonic - Sub-Dominant - Dominant. Basic harmonic progressions. Perfect Authentic Cadence (PAC). The use of V7 vs. V as a triad. Standard/Basic Harmonic Progressions in the nearby diatonic neighborhood. Use of the Tonic-Subdominant - Dominant - Tonic progressions.
