In the last 30 years, a distinctive intersection between disability studies — including disability rights advocacy, disability rights activism, and disability law — and disability arts, culture, and media studies has developed. The two fields have worked in tandem to offer critique of representations of disability in dominant cultural systems, institutions, discourses, and architecture, and develop provocative new representations of what it means to be disabled. Divided into 5 sections: Disability, Identity, and Representation Inclusion, Wellbeing, and Whole-of-life Experience Access, Artistry, and Audiences Practices, Politics and the Public Sphere Activism, Adaptation, and Alternative Futures this handbook brings disability arts, disability culture, and disability media studies — traditionally treated separately in publications in the field to date — together for the first time. It provides scholars, graduate students, upper level undergraduate students, and others interested in

the disability rights agenda with a broad-based, practical and accessible introduction to key debates in the field of disability art, culture, and media studies. An internationally recognised selection of authors from around the world come together to articulate the theories, issues, interests, and practices that have come to define the field. Most critically, this book includes commentaries that forecast the pressing present and future concerns for the field as scholars, advocates, activists, and artists work to make a more inclusive society a reality.

Despite her success setting a self-supported Fastest Known Time record on the Pacific Crest Trail in 2013, Heather "Anish" Anderson still had such deep-seated insecurities that she became convinced her feat had been a fluke. So two years later she set out again, this time hiking through mud, rocks, and mountain blazes to crush her constant self-doubt and seek the true source of her strength and purpose. The 2,180 miles of the Appalachian Trail, from Maine to Georgia, did not make it easy. Anderson

struggled with its infamous rain, humidity, insects, and steep grades for 54 days. But because she had to fight for every step, she knew when she reached the summit of Springer Mountain, the AT ' s southern terminus, that she had fully earned the trail. Of greater value, she learned to love herself and her body, and to feel the depth of her power. Examining emotional scars as well as her relationship with her mother, Anderson ' s deeply internal yet highly physical journey in *Mud, Rocks, Blazes* is an essential story.

In celebration of the 45th anniversary of *The Dark Side of the Moon*, Bill Kopp explores the ingenuity with which Pink Floyd rebranded itself following the 1968

departure of Syd Barrett. Not only did the band survive Barrett ' s departure, but it went on to release landmark albums that continue to influence generations of musicians and fans. *Reinventing Pink Floyd* follows the path taken by the remaining band members to establish a musical identity, develop a songwriting style, and create a new template for the manner in which albums are made and even enjoyed by listeners. As veteran music journalist Bill Kopp illustrates, that path was filled with failed experiments, creative blind alleys, one-off musical excursions, abortive collaborations, general

restlessness, and—most importantly—a dedicated search for a distinctive musical personality. This exciting guide to the works of 1968 through 1973 highlights key innovations and musical breakthroughs of lasting influence. Kopp places Pink Floyd in its historical, cultural, and musical contexts while celebrating the test of fire that took the band from the brink of demise to enduring superstardom.

This techno-economic performance review of selected fishing fleets in North and South America presents the findings of four country level studies of fishing fleets in the United States of America, Brazil, Chile and Peru. The review includes financial and economic information of 21 fishing fleet segments, including shrimp and groundfish trawlers, demersal trawlers, longliners, purse seiners, dredgers as well as hook and line fishing vessels. Analysis of the costs and earnings data of these important fishing fleet segments in North and South America, using survey data from 2012 -2017 for the US fleet segments and 2018 data for the South American countries ' fleets showed that 81 percent of the fleet

segments had a positive net cash flow. The net profit margins of 38 percent of the 21 fishing fleet segments were >10%. Two-thirds (67%) of the fleet segments presented positive results in terms of their capital productivity as the return on fixed tangible assets (ROFTA) was positive. Twenty four percent of the fleet segments showed return on investment (ROI) figures of twenty percent or more. A majority of the Chilean and Peruvian fleet segments had ROIs of ten percent or higher in 2018. The financial and economic performance of the fishing fleet segments is not only affected by the seafood prices, but also by the fisheries management regime in place, fish species targeted, fish stock status and fishing methods and technologies applied. The age structure of the fishing vessels shows an increasing trend for most of the fishing

fleet segments in this review, which adds to the apparent profitability of the vessels in these fleet segments as depreciation and interests on loans are minimized.
