A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today’s writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

In addition to lecturing on baseball history, professors are more frequently using baseball as a pedagogical tool to teach other disciplines. Baseball ’ s interdisciplinary appeal is evident in the myriad ways that diverse college faculty have made use of it in the classroom. In this collection of essays, professors from different disciplines explain how they have used baseball in higher education. Organized by academic field, essays offer insight into how baseball can help teach key issues in archival research, business, cultural studies, education, experiential learning, film, American history, labor relations, law, literature, Native American studies, philosophy, public speaking, race studies and social history.

This book opens with Angelika Kratzer and Luigi Rizzi talking about contemporary issues, such as non-recursiveness of focus and the semantics of topics. The chapters climb down the spine from the left periphery to DP: the value of subjunctive across the history of German, expressive expressions in Brazilian Portuguese, left and right dislocation and the speaker’s perspective in Italian, Brazilian double subjects and left dislocated topic, long versus short wh-movement in Brazilian Portuguese and Quebec French, low adverbs and the raising of the verb in Brazilian Portuguese, ellipsis and null objects in Brazilian and European Portuguese, and bare singulars in Brazilian Portuguese. The chapters propose original accounts for language variation and historical changes, most of them focusing on Brazilian Portuguese, a challenge to syntax and semantics. Thus, the volume contributes to Brazilian and Portuguese Linguistics, as well as to general and contemporary research on syntax and semantics of natural languages.

This volume contains innovative papers that target the linguistic status of topic at the  
interface between grammar and discourse. The purpose of the volume is to discuss the  
universal properties of topics and, at the same time, to document the range of discourse-  
semantic and grammatical variation within this phenomenon in European languages.  
The volume is structured accordingly: (i) theoretical foundations of topicality in grammar  
and discourse; (ii) discourse-semantic correlates of topicality; (iii) variation in the  
grammatical (external and internal) encoding of topicality; (iv) topics from the diachronic  
perspective. The articles take different perspectives, including contrastive studies of  
modern languages, studies on diachronic development, and typological generalizations.  
They also take into consideration various types of empirical data – introspective data,  
semi-spontaneously produced data, experimental data and language corpora. The  
articles in this volume show that the concept of topic is necessary for the description and  
explanation of a number of discourse-semantic phenomena. They present a state of the  
art account of the architecture of topic while making recent research on the  
phenomenon accessible to a wider readership.
