**Death At Midnight** Springer Science & Business Media  
This contributed volume provides 11 illustrative case studies of technological transformation in the global pulp and paper industry from the inception of mechanical papermaking in early nineteenth century Europe until its recent developments in today's business environment with rapidly changing market dynamics and consumer behaviour. It deals with the relationships between technology transfer, technology leadership, raw material dependence, and product variety on a global scale. The study itemises the main drivers in technology transfer that affected this process, including the availability of technology, knowledge, investments and raw materials on the one hand, and demand characteristics on the other hand, within regional, national and transnational organisational frameworks. The volume is intended as a basic introduction to the history of papermaking technology, and it is aimed at students and teachers as course material and as a handbook for professionals working in either industry, research centres or universities. It caters to graduate audiences in forestry, business, technical sciences, and history.

THE WRITER'S RESPONSE teaches students not only the basics of paragraph and essay writing—unity, coherence, and support—but also the basics of academic writing, making it a complete source for students preparing for higher-level work. Through a variety of exercises and extensive readings, the text teaches students to read carefully and summarize accurately, to recognize and respond to specific points in the material they have read, to synthesize ideas from several reading selections, and to evaluate and argue about the ideas they have found in their reading material. Although the authors' focus is on writing about reading, they also encourage students to use their personal experiences to develop and support their ideas. This combination results in a text that not only imparts the fundamentals of college-level writing, but also helps each student find his or her own voice—and discover that they do, indeed, have something to say. Biophysics and Other Topics: Selected Papers by Aharon Katzir-Katchalsky covers papers on polyelectrolytes, mechanochemistry, irreversible thermodynamics, membrane processes, network thermodynamics, biophysics, and science and humanities. The book discusses on polyelectrolytes, the electrostatic potential, thermodynamic

properties, interaction with small molecules and ions, and cooperative transitions. The text also describes mechanochemistry; dynamics of macromolecular interactions; hysteresis; and memory. Irreversible thermodynamics, theory of membrane processes, and network thermodynamics are also considered. The book further tackles the reactions of amino acids with aldoses, polypeptide synthesis, and prebiotic synthesis. The text then encompasses topics on surface activity of polyelectrolytes; properties of the red cell membrane; and science and the humanities. People involved in the study of the above mentioned topics will find the book invaluable.

In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility.

Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities.

A First Nations former hockey star looks back on his life as he undergoes treatment for alcoholism in this novel from the author of *Dream Wheels*. Saul Indian Horse is a child when his family retreats into the woods. Among the lakes and the cedars, they attempt to reconnect with half-forgotten traditions and hide from the authorities who have been kidnapping Ojibway youth. But when winter approaches, Saul loses everything: his brother, his parents, his beloved grandmother—and then his home itself. Alone in the world and placed in a horrific boarding school, Saul is surrounded by violence and cruelty. At the urging of a priest, he finds a tentative salvation in hockey. Rising at dawn to practice alone, Saul proves determined and undeniably gifted. His intuition and vision are unmatched. His speed is remarkable. Together they open doors for him: away from the school, into an all-Ojibway amateur circuit, and finally within grasp of a professional career. Yet as Saul's victories mount, so do the indignities and the taunts, the racism and the hatred—the harshness of a world that will never welcome him, tied inexorably to the sport he loves. Spare and compact yet undeniably rich, *Indian Horse* is at once a heartbreaking account of a dark chapter in our history and a moving coming-of-age story. “Shocking and alien, valuable and true... A master of empathy.”—Jane Smiley, Pulitzer Prize-winning author of *Golden Age* “A severe yet beautiful novel.... *Indian Horse* finds the granite solidity of Wagamese's prose polished to a lustrous sheen; brisk, brief, sharp chapters propel the reader forward.”—Donna Bailey Nurse, *National Post* (Toronto)

"Multi-stakeholder governance is a fresh approach to the development of transnational public policy, bringing together governments, the private sector and civil society in partnership. The movement towards this new governance paradigm has been strongest in areas of public policy involving global networks of stakeholders, too intricate to be represented by governments alone. Nowhere is this better illustrated than on the Internet, where it is an inherent characteristic of the network that laws, and the behaviour to which those laws are directed, will cross national borders; resulting not only in conflicts between national regimes, but also running up against the technical and social architecture of the Internet itself. In this book, Jeremy Malcolm examines the new model of multi-stakeholder governance for the Internet regime that the Internet Governance Forum (IGF) represents. He builds a compelling case for the reform of the IGF to enable it to fulfil its mandate as an institution for multi-stakeholder Internet governance."--Provided by publisher.

Writing for College and Beyond prepares students for their future college classes by covering the strategies common to most college writing. In the process of being prepared for college writing, however, students are also taught chapter by chapter how these writing skills will carry forward into their future professional lives beyond college. One of the least expensive first year writing textbooks on the market, the text isn't inflated with material that most instructors and students won't use, and several exercises encourage students to use either provided web or YouTube links as texts supporting their practice for longer assignments. If you're a first year writing instructor and would like to consider this text for your course, email the author at brightfuturespublishing (at) gmail (dot) com for a desk copy.

Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and

free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

MCDM 2009, the 20th International Conference on Multiple-Criteria Decision Making, emerged as a global forum dedicated to the sharing of original research results and practical development experiences among researchers and application

developers from different multiple-criteria decision making-related areas such as multiple-criteria decision aiding, multiple criteria classification, ranking, and sorting, multiple objective continuous and combinatorial optimization, multiple objective metaheuristics, multiple-criteria decision making and preference modeling, and fuzzy multiple-criteria decision making. The theme for MCDM 2009 was "New State of MCDM in the 21st Century." The conference seeks solutions to challenging problems facing the development of multiple-criteria decision making, and shapes future directions of research by promoting high-quality, novel and daring research findings. With the MCDM conference, these new challenges and tools can easily be shared with the multiple-criteria decision making community. The workshop program included nine workshops which focused on different topics in new research challenges and initiatives of MCDM. We received more than 350 submissions for all the workshops, out of which 121 were accepted. This includes 72 regular papers and 49 short papers. We would like to thank all workshop organizers and the Program Committee for the excellent work in maintaining the conference's standing for high-quality papers.
