The only point of such a basic, point-set topology textbook is to get you to the point where you can work through an (Algebraic) Topology text at the level of Hatcher. To that end, Munkres' book is a waste of time. Overrated and outdated. Truth be told, this is more of an advanced analysis book than a Topology book,...

The first two chapters are on metric and topological spaces, respectively; the third and fourth treat, first, homotopy theory (at about the level it is treated in Munkres' Topology) and then – an unusual feature of books at this

level – higher homotopy groups and related topics.
