Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (July - December) The Wills Eye Manual John Wiley & Sons National Book Critics Circle Award Winner: "The terrifying story of the worst disaster in the history of the US Forest Service's elite Smokejumpers." —Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean's now-canonical *A River Runs Through It* and *Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean's later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The*

Big Burn and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul.

The ten stories gathered together in *The Tomorrow-Tamer* are Margaret Laurence's first published fiction. Set in raucous and often terrifying Ghana, where shiny Jaguars and modern jazz jostle for eminence against fetish figures, tribal rites, and the unchanging beat of jungle drums, the stories tell of individuals, European and African, trying to come to terms with the frightening world brought about by the country's new freedom. With the same compassion and understanding she would bring to her later fiction set in Canada, Laurence succeeds brilliantly in capturing the atmosphere of a continent and of individual men and women struggling for survival under the impact of the wind of change.

This book presents a comprehensive overview of current knowledge and issues in the field of turfgrass research and management, including the genetics and breeding, the diseases and pests, and the ecology of turfgrasses, and will appeal to a broad spectrum of readers.
