It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

This book is for anyone who works with boilers: utilities managers, power plant managers, control systems engineers, maintenance technicians or operators. The information deals primarily with water tube boilers with Induced Draft (ID) and Forced Draft (FD) fan(s) or boilers containing only FD fans. It can also apply to any fuel-fired steam generator. Other books on boiler control have been published; however, they do not cover engineering details on control systems and the setup of the various control functions. Boiler Control Systems Engineering provides specific examples of boiler control including configuration and tuning, valve sizing, and transmitter

specifications. This expanded and updated second edition includes drum level compensation equations, additional P&ID drawings and examples of permissive startup and tripping logic for gas, oil, and coal fired boilers. It also covers different control schemes for furnace draft control. NFPA 85 Code 2007 control system requirements are included, with illustrated examples of coal fired boilers, as well as information on the latest ISA-77 series of standards.

The ten stories gathered together in *The Tomorrow-Tamer* are Margaret Laurence's first published fiction. Set in raucous and often terrifying Ghana, where shiny Jaguars and modern jazz jostle for

eminence against fetish figures, tribal rites, and the unchanging beat of jungle drums, the stories tell of individuals, European and African, trying to come to terms with the frightening world brought about by the country's new freedom. With the same compassion and understanding she would bring to her later fiction set in Canada, Laurence succeeds brilliantly in capturing the atmosphere of a continent and of individual men and women struggling for survival under the impact of the wind of change.

Sustainability is a key framework for analyzing biological systems—and turfgrass is no exception. It is part of a complex that encompasses turfgrass interactions with different environments and the suitability of different turfgrasses for specific environments. In addition to its biological role, turfgrass—in the form of lawns, green spaces, and playing surfaces—brings beneficial sociological effects to an increasingly urbanized society. This book presents a comprehensive overview of current knowledge and issues in the field of turfgrass research and management, including the genetics and breeding, the diseases and pests, and the ecology of turfgrasses, and will appeal to a broad spectrum of readers.

National Book Critics Circle Award Winner: "The terrifying story of the worst disaster in the history of the US Forest Service's elite Smokejumpers." —Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean's now-canonical *A River Runs Through It* and *Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean's later triumph—the last book he would write—includes a powerful new foreword by

Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul. "A moving account of humanity, nature, and the perseverance of the human spirit." —Library Journal "Haunting." —The Wall Street Journal "Engrossing." —Publishers Weekly
