Using Lady Morgan's The Wild Irish Girl as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's Castle Rackrent through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

Saturn and Melancholy remains an iconic text in art history, intellectual history, and the study of culture, despite being long out of print in English. Rooted in the tradition established by Aby Warburg and the Warburg Library, this book has deeply influenced understandings of the interrelations between the humanities disciplines since its first publication in English in 1964. This new edition makes the original English text available for the first time in decades. Saturn and Melancholy offers an unparalleled inquiry into the origin and development of the philosophical and medical theories on which the ancient conception of the temperaments was based and discusses their connections to astrological and religious ideas. It also traces representations of melancholy in literature and the arts up to the sixteenth century, culminating in a landmark analysis of Dürer's most famous engraving, Melencolia I. This edition features Raymond Klibansky's additional introduction and bibliographical amendments for the German edition, as well as translations of source material and 155 original illustrations. An essay on the complex publication history of this pathbreaking project - which almost did not see the light of day - covers more than eighty years, including its more recent heritage. Making new a classic book that has been out of print for over four decades, this expanded edition presents fresh insights about Saturn and Melancholy and its legacy as a precursor to modern interdisciplinary studies.
