Catalog of Copyright Entries, Third Series Haynes Manuals N. America, Incorporated Born to a wealthy family in West Africa around 1770, Omar Ibn Said was abducted and sold into slavery in the United States, where he came to the attention of a prominent North Carolina family after filling “ the walls of his room with piteous

petitions to be released, all written in the Arabic language, ” as one local newspaper reported. Ibn Said soon became a local celebrity, and in 1831 he was asked to write his life story, producing the only known surviving American slave narrative written in Arabic. In *A Muslim American Slave*, scholar and translator Ala Alryyes offers both a definitive translation and an authoritative edition of this singularly important work, lending new insights into the early history of Islam in America and exploring the multiple, shifting interpretations of Ibn Said ’ s narrative by the nineteenth-century missionaries, ethnographers, and intellectuals who championed it. This edition presents the English translation on pages facing facsimile pages of Ibn

Said ' s Arabic narrative, augmented by Alryyes ' s comprehensive introduction, contextual essays and historical commentary by leading literary critics and scholars of Islam and the African diaspora, photographs, maps, and other writings by Omar Ibn Said. The result is an invaluable addition to our understanding of writings by enslaved Americans and a timely reminder that " Islam " and " America " are not mutually exclusive terms. This edition presents the English translation on pages facing facsimile pages of Ibn Said ' s Arabic narrative, augmented by Alryyes ' s comprehensive introduction and by photographs, maps, and other writings by Omar Ibn Said. An award-winning scientist offers his unorthodox approach to childrearing:

“Parentology is brilliant, jaw-

droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health

outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
