The premier resource for how to deliver results in an

you're running an entire

management job. "A must-

read for anyone who cares

about business."—The New

York Times When

Execution was first

published, it changed the

way we did our jobs by

focusing on the critical

importance of "the

discipline of execution": the

ability to make the final leap

to success by actually

getting things done. Larry

Bossidy and Ram Charan

now reframe their

---

empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future:

- Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge.
- Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management.
- Governments will take on new roles in their national economies, some as partners to business, others imposing constraints.
- Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation.

Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples

---

like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan. *How to Restore Triumph TR5, TR250 & TR6* Haynes Publishing
